COMING EVENTS

Friday, Feb. 3—Arlington here.
 Tuesday, Feb. 7—Lexington, there.
 Friday, Feb. 10—Condon here.
 Tuesday, Feb. 14—Ione, there.
 Friday, March 17—Junior Play.

Club Activities

Ouring the last week the various clubs of Heppner High seemed to slip back into hibernation with only two holding meetings. These were the H club and Home Economics club.

The H club met on Thursday and planned their program, which they presented before the assembly Friday. They made plans for a dance to be held after the game Friday with Arlington. In the near future they will also sponsor a smoker with Condon.

The Home Economics club met Wednesday and gave out the parts to the various members who are to take part in their assembly to be presented Feb. 9. This is to be in the form of a minstrel.

Idle Thought

Please have some respect for age, and do not tear these jokes apart.

Bob—"John accepts kisses from strange women."

Emery—"Well, what other kind would he get them from."

Mr. Knox—"Who broke the glass?"
 Thomas—"I don't know; I only poured water on it."

Bill—"Maybe it was hard water."

Lowell—"A glorious feeling, that sensation of man pitting his strength against the forces of nature."

Caroline—"How would you know?"

N. E. P.—"I can write my name in the dust on his desk."

Dad D.—"Ain't education wonderful?"

Humor Reporter—"Let's start a home for old jokes."

Editor—"We don't need to. They all come here anyway."

Seen in the Dark

Jack O'Hara with a certain freshman girl. (Initials P. T.)

Harry Tamblin reading a love story. (Why?)

Trouble in lovers' lane. (Definitely.)

Dug Drake upon the stage. (Whom with?)

Time flying by. (So what?)

Dean Gilman in a bear trap. (Goody.)

Dear hunters. (No remarks.)

Howard Patton defying the law of gravity.

H club program. (Not ready.)

Milton Morgan without a hat.

Ruth Green in a Model T Ford. (I wonder whose it was; ask Ruth.)

Bill Barratt nearly getting in the wrong car.

Odds and Ends

We have heard of sailors having a girl at every port, but Milton Morgan doesn't do so bad.

Carolyn Vaughn and Don Jones were seen together Sunday. What happened to Jack?

Donnie Bennett is still fond of a blond.

Cora Scott's face turned a brilliant red when Hughie entered the Elks hall.

GAS HOUSE GOSSIP

By JOE AIKEN

Hopes for the Hermiston-Heppner smoker are a thing of the past as Hermiston has done nothing toward accepting our invitation. This smoker was carried out between the schools for the past two years, being held once at each school. Heppner has won both of these contests thus far. Last year Hermiston won but one bout. The H club has decided upon sponsoring one with Condon. The F. F. A. had originally anticipated an inter-chapter bout with the Condon F. F. A. but hasn't found time as yet. The Condon lads have been training since school started for the smoker with the local F. F. A. They finally stated that they would fight any club or team that we would send over. The H club accepted the offer and the date is yet to be set. However, it will be some time in March.

Speaking of school papers, the grade school has edited a paper ever since last year. It has been very successful in that they have paid for all the stencils and mimeograph paper used in its publication with proceeds from the sale of the paper. The paper is put out by the two upper grades; Miss Forsythe acts as chief advisor. They have humor, sports events, editorials, and puzzles in it. It is published bi-monthly.

Such a paper is being experimented with in the high school. Its first issue was published this week and proved to be of great interest. It is composed here in the school by students and published here.

The local team stepped into a wider lead by winning its third league game. This makes three games won and one defeat, which places Heppner upon the top of the league ladder in a fairly stable position. This Friday the local lads meet the only league team to defeat them this season—namely, Arlington. This team is in the cellar now, but it beat Heppner once with comparative ease this year and stands a fair chance of winning again. If Arlington does win, it will mean that the first spot in league standings will be tied up again.

Irrigon took a bad tumble the other night when Lexington beat them upon Irrigon's own court. Up until this defeat they led their league without a defeat, until Lex, the third team upon the ladder, broke the record. This ties Umatilla and Irrigon for first place. Upon talking to a Lexington lad, he revealed the fact that that school plans to win the sub-district tournament. They have proved their ability several times this year and seem to time their wins at the most opportune moments.

Here is another puzzle for the dopesters. Hermiston loses to Irrigon, Irrigon loses to Lexington, Lexington loses to Heppner, and Heppner loses to Hermiston.

The local Future Farmers journeyed to Pendleton and suffered a bad defeat at the hands of the latter team as the final whistle found the score 75 to 14. The second team also lost but by a close margin. When they played here, Pendleton won both games but by smaller margins.

Here and yon: All the basketball boys attended the dance in Heppner after they returned from Condon. The H club is sponsoring a dance after the Arlington game. Maybe some of them will dance. Several basketball boys were entertained at the home of Edna Stephens. They dined upon chicken. (Pretty soft.) Richard Hayes is suffering the ill effects of a broken nose as a result of participating in the smoker last Saturday. The tallest basketball player on record comes from back east. He stands 6 feet 9 1/2 inches in his stocking feet.

English Essentials Test Results

This test, given at the end of each semester, enables the student to know where he stands so far as his general knowledge of English fundamentals is concerned. In this test the student is able to find and correct his "everyday" errors in speech and written language.

The results in no way affect the student's grade. The average of each class is taken and one's score shows whether or not his ability and knowledge of English fundamentals is satisfactory as compared with others of his group.

The minimum essentials results

are as follows:

Under average is the average number of errors in that class; range is the least and the most errors made; and limit is the largest amount of errors one should have in order to be "satisfactory."

Seniors, average, 25.4; range 4-65, limit, 27.

Juniors, average 24.3; range, 4-55; limit, 29.

Sophomores, average 30.8; range 7-76, limit, 34.

Freshmen, average 35.5; range 10-68, limit, 39.

Gossip

Who was that handsome "critter" we saw you with Sunday afternoon, Margaret? I know he isn't in high school.

Milton thinks Condon has some pretty nice girls. Don't you, Milt?

Bob Swick and Mary Emma were out riding on Bob's bicycle Sunday afternoon. No wonder Mary Emma is singing "On a Bicycle Built for Two."

I wonder why Donnie and Harry were in such a hurry to get home Saturday night?

For a while we thought Kemp had indelible lipstick on his face, but it turned out to be just indelible.

The city pick-up was using the spot light again. For further information ask Bill Browning.

Smash!! Lee, Pettyjohn and Birdine Vance to the smoker Saturday.

My, my, but the English IV class has three love affairs. Not bad for one class.

Twenty Years From Now

Heppner will defeat Hermiston in basketball by a one-point margin. We hope!!

Jack Merrill's orchestra opened for a week's engagement at Coconut Grove.

Everyone in journalism class found time to hand in his assignment.

We can't see why we should waste our time doing this. Art McAtee will probably blow the whole town up with his chemicals before then anyway.

The chemistry lab will be air-conditioned, so when the odor gets disagreeable, it won't spread all over the building.

Mr. Peavy will give up making predictions on games. It's too bad, too, because the law of averages would let him hit it some time in a period of twenty years.

Did You Know That—

Sibyl and John are feeling "that way" about each other again?

Margaret Doolittle was awfully interested in the new boy? (Watch out, Bob.)

Mr. Blankenship likes to argue? Dick Bbgoger likes to write poetry? (Who is she, Dick?)

Milton Morgan is the man of "the hour"?

Jack Merrill is going to be seen at the trigonometry class on time?

We have a new red-headed girl in school? (Watch out, boys.)

Jean Hays has finally found the man of her heart?

It takes two girls to handle Milton?

Omer McCaleb wants to go back to Pendleton?

James Moyer, Pete Stone, and Floyd Williams really went to town at Pendleton?

Milton got home at 5 a. m. Sunday?

Cora Scott is love sick?

Joe Aiken likes blondes?

Harry O'Donnell is the mender of broken hearts?

Guess Who?

Height 5 ft, 6 1/2 in.; weight 125, color of hair, brown; color of eyes, blue; age, 15; class, sophomore; plays guard on basketball team.

Height, 5 t., 2 in.; weigh, 116; color of hair, red; color of eyes, blue; age, 16; class, junior; known by the heart trouble she causes between two sophomore boys.

KOAC Adds 9 P. M. College Hour to Daily Broadcast

A new "Oregon State College Hour," from 9 to 10 o'clock p. m. daily except Sunday, has been started over the state-owned radio station KOAC. The new program will consist of educational discussions from all departments with local musical features, supplementing the

previous farm hours and general features through the other periods that KOAC is on the air.

The new arrangement means the extension of the KOAC operating period an hour longer at night, making use of what is generally considered one of the most favorable night time hours.

Definite program outlines extending through to May 1 have been arranged by a committee appointed by President G. W. Peavy. The object will be to give the thousands of KOAC listeners the benefit of more material available from all departments on the college campus than has been broadcast in the past, says W. L. Teutsch, chairman of the special committee which arranged the new schedule.

The new college hour each night will begin with a round-table discussion in which current topics will be discussed by a group of faculty men or faculty and advanced students. For the week of February 6 to 11, these discussion subjects will be "New Uses for Old Crops," "Old Books Versus New," "Youth Hostels in the Northwest," "The Willamette Valley During the Ice Age," "The Engineer's position in Society," and "Wild Life Management in Oregon."

Other topics scheduled for that week will be "Highlights of the Recent Pacific Northwest Rural Electrification Conference," "The Robinson-Patman Act and Other Price Supporting Measures," "The Chemistry of the Sea," "An Industrial Heritage," "The Lumber Industry Today," "Balancing the Federal Budget," "The Life of a Forester," "Advances in Pharmaceutical Education," and "Our Social Insects." Musical periods will be under the direction of the department of music at Oregon State.

Addition of this new hour serves further to expand the educational offerings of KOAC, which already broadcasts material for all of the state institutions of higher learning, and many of the private universities and colleges.
