87 Per Cent of Oregon Crop Land in 3-A Plan

Operators of 87 per cent of Oregon's crop land have given advance notice of intention to participate in the 1939 AAA program, according to figures compiled by the state office at Corvallis. This represents close to 42,000 farmers who operate about 3,800,000 acres of crop land.

"Government payments that these farmers will earn will not all be profit," said N. C. Donaldson, state executive officer. "Usually the cost of carrying on the conservation practices is greater than the payment received. Hence the farmers really earn the payments made possible by the program."
