

### Miss Rachel Anglin Bride at Yakima

A beautiful church wedding attended by some 300 friends and relatives was solemnized at the Nazarene church of Yakima, Wash., on Tuesday evening, July 4, at 8 o'clock when Miss Rachel Anglin, daughter of Mr. and Mrs. John Anglin of this city, became the bride of Mr. John Bromley of Yakima. The services were read by Rev. C. H. Yadon of the Emanuel church.

The bride, given in marriage by her father, wore a dress of silk net over white satin with finger veil held in place by orange blossoms her grandmother wore. Her bouquet was Regal lilies and pink carnations.

Miss Madelon Bromley, the groom's sister, was maid of honor, and wore a frock of orchid taffeta and carried a bouquet of sweet peas. Attending her was Mrs. Kenneth Johnson of Seattle wearing a frock of peach taffeta, and Miss Helen Eisele wearing pastel green taffeta, each carrying pink roses.

Little Lois Pettit dressed in pink was flower girl, carrying a white satin basket of rose petals, and Junior Yadon with a white satin pillow was ring bearer.

Kenneth Johnson, brother-in-law of the groom, was best man. Byron and David Bromley were ushers.

Preceding the service, an instrumental number, "I Love You Truly," was played by piano, electric guitar and two violins, and Miss Vava Walker sang "Because," accompanied by her sister, Miss Victory, at the piano. Miss Mary Stusick played the wedding march accompanied by Mrs. C. Curtis with the electric guitar.

A reception at the home of Mr. and Mrs. J. L. Bromley followed the service.

A very beautiful four-tier wedding cake trimmed with 42 pink roses, white satin bows and a bride and groom that decorated the grandmother's cake was made by Mr. Arnold Sharp, manager of the Heppner bakery. The cake, a beautiful piece of workmanship, was rightly named, "The most beautiful cake I have ever seen."

Mr. and Mrs. Bromley left following the reception for a brief trip to Couer d'Alene, Idaho, and Canada, to return July 15 to Yakima where they will make their home.

### Pre-Fourth Rainfall .25 of an Inch

A precipitation of .25 of an inch was the net result of the rain which visited this section Monday, according to L. L. Gilliam, Heppner weather observer. The showers appeared to have been heavier in the southern part of the county than elsewhere.

The heavy weather threatened to disrupt celebration plans and many local people deferred final preparations until the morning of the Fourth which turned out to be a perfect day for observing the nation's birthday.

Precipitation for the month of June remained unchanged from the report given in the Gazette Times two weeks ago.

### VICTIM OF CRACKER

While no accidents, major or minor, have been reported in and around Heppner, at least one Heppner citizen suffered injury while celebrating the Fourth. Max Schultz was the victim of a "cracker" explosion at Echo. An over-enthusiastic celebrant tossed a big firecracker at Schultz' feet with the result that his trouser leg was torn off almost to the knee and he suffered a burned and lacerated ankle.

### IS TRANSFERRED

L. F. Simpson, superintendent in charge of construction on the Umatilla National forest for 14 years, was recently transferred to the Whitman forest, reports F. F. Wehmeyer, local ranger. No assignment has been made to fill the position.

Oregon farmers decreased their traffic accidents by nine per cent during May, 1939, compared to May, 1938, figures released by Earl Snell, secretary of state, showed today. Farmers were involved in 224 traffic accidents this May, compared to 247 for the same month a year ago.

## At Heppner • • CHURCHES

1st Wednesday, Ladies Aid Business and Social Meeting ..... 2:30 P. M.  
All other Wednesdays: Sewing Group meets.  
Thursday: Prayer Meeting ..... 7:30 P. M.

### Some Foods Need "Color Glasses" In Summer Time

Light as well as heat is a major factor in causing fatty or oily foods to become rancid, a condition which may frequently be prevented by using colored or opaque coverings, says Miss Lucy A. Case, nutrition specialist of the Oregon State college extension service, in reviewing recent experiments of the USDA bureau of chemistry and soils.

During the summer months, when sunlight is long and intense, these foods become rancid more quickly. The refrigerator is a good place to store most of them, not only because it keeps them cold, but because in excluding light it keeps them fresh, says Miss Case.

Research men have discovered that when oil-bearing foods were enclosed in green, black, or foil containers, rancidity was appreciably delayed. Potato chips packed in ordinary commercial baks during the test turned rancid within a week. When wrapped in green paper they remained fresh and edible for at least two weeks. Cashew nuts kept in a clear glass bottle and exposed to direct sunlight became rancid in four days. Another sample of cashews kept in a green bottle under the same light conditions remained fresh for more than eight months. So did cornmeal, peanut butter, walnuts, and lard.

Others have found that green containers preserved the aroma, freshness, and flavor of fruit juices, sauerkraut juice, and coffee better than any other color.

The most effective shade of green for these light-excluding containers is a chlorophyll or grass green. Manufacturers of food containers have means of testing the exact shade of their containers. Ordinarily the homemaker has not, but she can approximate it with good results. She can also keep her supplies cold as well as dark, and buy in small quantities in warm weather.

### "LES" INGRAM VISITS

Some twenty years ago, Lester Ingram, then a student in Heppner high school, made history as a sprinter. His outstanding historical sprinting feat was to beat Ben Patterson's Cadillac, with Henry Cohn at the wheel, in an exhibition race at county fair time—both Ingram and the Cadillac making a dead start and covering a distance of a hundred yards. That incident was several times recalled Monday when "Les" was making the rounds about town visiting old-time friends. He now resides at Nampa, Idaho, where he has carried mail for Uncle Sam for 17 years. Leaving here early in 1918, he joined the navy from Ogden, Utah, at war time. Married shortly before enlisting in the navy, he now has a son who just finished high school, a 15-year-old daughter, and a nice home at Nampa. He was accompanied here by Mr. and Mrs. Alden Hartzell of Nampa, Mrs. Hartzell being a daughter of Mr. and Mrs. Chas. Iremonger of Fossil, and Mr. Iremonger drove here to meet them and take them to the parental home for a short visit. All returned to Nampa yesterday.

### New Clover at OSC Looks Like Winner

Among all the new and improved crops under test at the central experiment station at Oregon State subterranean clover has attracted the most attention from visitors at station field days this spring, reports G. R. Hyslop, head of the division of plant industries.

This clover is an annual but one that renews its stand each year by the simple expedient of poking its own seed into the soil before the current crop dies. It grows rapidly throughout the season and gives promise of making an excellent pasture legume in coast and Willamette valley counties.

Don't write in for seed, warns Prof. Hyslop, as there is none available for distribution. The experimental patch on the station is less than a tenth of an acre, and the only other planting for seed in the state is a small one in Coos county. The station has ordered some seed from Australia where the crop has been grown many years, so it is possible that a little seed will be available next season for tests in other counties.

Subterranean clover was introduced here three years ago and has had agronomists marveling ever since at its peculiar but highly efficient habits of growth. So far as known the only other place in the country it is being grown is in southeastern Texas where it is also proving highly successful, so much so that people there are also looking for more seed than they can raise.

Hyslop believes the new clover offers excellent possibilities for improving western Oregon hill pastures and others where irrigation is not available.

### BUILDING HOUSE

Construction of a modern five-room residence is under way for Mr. and Mrs. Norton Lundell. The house is being built on a lot adjoining the Lundell service station on Chase street. The foundation was finished last week and carpenters are now engaged erecting the frame work. Completion of the house is set for the latter part of August. N. D. Baily, local contractor, is in charge.

### SAND HOLLOWITES PICNIC

Present and former residents of Sand Hollow to the number of 40 gathered at the Turner-McCarty summer place on upper Willow creek last Sunday for a picnic. Fried chicken formed the piece-de-resistance at dinner time, while horse-shoe pitching, softball and a historical contest provided entertainment.

### IMPROVING RESIDENCE

The residence of Mrs. Alta Cutsforth on Gilmore street is being covered with imitation brick veneer of fireproof texture, enhancing its appearance while providing additional insulation. Thornburg brothers of Lexington are doing the work.

Twenty per cent of traffic accidents reported in the state of Oregon during the month of May occurred between the hours of 7 p. m. to 5 a. m., Earl Snell, secretary of state, announced today. For April, accidents during this time of day amounted to 26 per cent of the total reported to the secretary of state. The most dangerous time of day, so far as traffic accidents are concerned, is from 4 to 6 p. m., the figures showed.

May, 1939, showed a decrease of 17 per cent from May, 1938, in the number of traffic accidents reported on heavily traveled highways, figures by Earl Snell, secretary of state, revealed today. Accidents on lightly traveled highways increased 14 per cent this May.

Under the 1939 federal crop insurance program, 163,000 wheat farmers insured a production of 70,000,000 bushels by paying approximately 7,000,000 bushels into the insurance reserve.

Mr. and Mrs. E. L. Morton, Arlene and Jack, and a sister of Mr. Morton's from California, were guests yesterday at the home of Mr. and Mrs. Chas. B. Cox on their

way from a visit at Ontario to the Morton's home at Newberg. Mr. Morton was formerly manager of the local branch, First National Bank of Portland.

Tom Dean, chief of police at Hood River, was in the city this morning while visiting his sister, Mrs. O. E. Johnson, on vacation from his work. While fishing yesterday on Porter creek, Mr. Dean landed a beautiful 2 1/4 inch trout weighing three pounds.

Hit-and-run accidents took no lives in Oregon during the month of May this year, but two such accidents resulted in fatalities during May a year ago, figures reported to Earl Snell, secretary of state, revealed today. There were 73 hit-and-run accidents this May compared to 78 a year ago.

Truck accidents during the month of May were two per cent less serious than those of the same month

a year ago, figures compiled by Earl Snell, secretary of state, revealed today. Ten per cent of the 593 accidents involving trucks this May resulted in deaths or injuries while 12 per cent of the same type of accidents resulted seriously last May.

Edward Peltier, fire assistant from the Pendleton office, Umatilla National forest, is expected to visit the Heppner district this week end.

For Immediate Sale — Desirable modern home, superior location, all household furniture, including electric range, refrigerator and water heater. Lucile McAtee, Heppner, 6-22fc
