1939 Motor Cruise: To Long Beach

Broad beaches are broken at points by rocky headlands on the Long Beach peninsula. Above is a view north from North head.

This newspaper is co-operating with the Oregon State Motor association and The Oregonian in presenting a series of motorlogs designed to stimulate travel in Oregon and the Pacific northwest. This article was condensed from a full-page article appearing in The Oregonian July 16.

The Long Beach, Washington, peninsula, famed for its 28-mile-long ocean beach speedway and for its fine surf bathing, attracted the white motorlog automobile of The Oregonian-Oregon State Motor association in a loop trip that provided 285 miles of scenic interest over good roads. The trip to the beaches was made from Portland via Vancouver, then down the north bank of the Columbia river through Longview, Cathlamet, Skamokawa, to Ilwaco at the mouth of the river, a total distance of 138 miles. Skamokawa, Grays River, Naselle the motorloggers discovered were picturesque towns that still retain the charm of this pioneer country, a virtual stranger to highways and automobiles until within recent years. The highway down the north bank of the river was found to be excellent except where the narrow, winding road over the "K-M" hill west of Skamokawa and a few newly graveled sections required slow speed. From Ilwaco the Long Beach peninsula stretches 28 miles north, flanked by the Pacific on one side, Willapa bay on the other. The bustling resort cen-

ters of Seaview, Long Beach, Ocean Park and others attract thousands of vacationists and holiday merrymakers. A good gravel surface road extends up the peninsula as far as Oysterville, quaint and popular vacation spot. Or the motorist may drive the hard sands of the ocean beach. The return portion of the loop trip was made by crossing

the Columbia river on one of the big ferry boats that ply between Astoria and Megler, Wash., the latter point 11 miles east of Ilwaco. Average time of crossing the great river is 25 minutes. The return route from Astoria was eastward up the Columbia over the paved Lower Columbia River highway, a distance of 105 miles.

The route down the North Bank highway to the peninsula and back up the south side is mapped here.
