

Reclamation Now Of Interest on Statewide Basis

Reclamation is no longer of merely sectional interest in Oregon, judging by the large attendance from all parts of the state at the annual convention of the Oregon Reclamation congress held at Clatskanie early in September.

Instead of being considered merely in connection with large irrigation projects reclamation now includes such matters as summer irrigation on a farm basis in western Oregon or elsewhere, drainage of irrigated valleys in eastern Oregon as well as the wet lands of the Willamette valley, and, in addition, it means the reclamation of logged-off lands.

Approximately 1500 people heard Governor Charles A. Sprague discuss these questions at a community-wide barbecue sponsored by Clatskanie. Both Governor Sprague and Dean William A. Schoenfeld of Oregon State college emphasized the growing importance of logged-off land reclamation for grazing, reforestation, and fish and game production.

John C. Page, U. S. commissioner of reclamation, said that western developments add to the wealth and provide for replacement of consumable national resources. Most projects now have a multiple purpose, with greater interest in flood control and fish and game conservation, he said.

Resolutions adopted by the congress urged a larger acreage allotment of sugar beets for irrigation projects, endorsed the work of the United States engineers on the lower Columbia and Willamette basins, endorsed the work of the bureau of reclamation on the Deschutes project, urged continuation of feasibility studies and use of snow surveys, and endorsed the use of CCC camps on federal irrigation and federal aid drainage projects.

Frank T. Morgan of Nyssa was re-elected president and Dr. W. L. Powers, O. S. C., secretary-treasurer. George T. Cochran of La Grande was chosen vice-president-at-large; Reed Carter, Grants Pass, vice-president for the first district; John W. Mohr, Hood River, vice-president, second district; and B. T. McBain, Portland, vice-president, third district. Neal Allen of Grants Pass and B. E. Hayden, Klamath Falls, were named other directors. Klamath Falls was chosen for next year's convention.

WATERWAYS WORK VITAL

Continued from First Page

Channel improvement on the Columbia from Celilo to Umatilla was completed in June last year, and cargo boats carrying both up- and down-river tonnage are plying past Umatilla rapids as far inland as Attalia, Wash. Dredging of channel from Vancouver, Wash., to Bonneville to a depth of 27 feet has been authorized, funds appropriated by the 75th congress, and engineers estimate project's completion by May, 1940.

Economic approval has been given by corps of army engineers for the completed program from The Dalles to Lewiston, Idaho, providing for four dams on the Columbia river to the mouth of the Snake river and four dams on the Snake. This approval was made in June, 1938. Legislation was introduced the first of this year to take the first step in the program, construction of Umatilla Rapids dam and four locks and dams on the Snake. Umatilla Rapids only survived, and this project is on the senate calendar for consideration at the next session of congress.

Since 1934 when this association was organized, ocean transportation has been provided to The Dalles, and river boat transportation to Attalia, Wash. Considerable growth in the last 18 months has taken place on the river bank in petroleum and bulk wheat facilities. At Attalia there is storage for 3,500,000 gallons of petroleum products. At Umatilla major oil companies have established some 3,500,000 gallons of storage, and approximately the same storage capacity is located at The Dalles. Walla Walla Grain Growers have a 44,000-bushel grain elevator at At-

talia and another 25,000-bushel private elevator is located at the same point. Port of Arlington has a bulk elevator at Blalock.

Improved boat construction is one of the best criteria of the forward movement of transportation on the river. From development thus far, it is not visionary to say that within the near future million gallon cargoes of gasoline up the river will be a common sight. With this increase in inland cargo, proportionate out-bound wheat movements will take place.

Morrow county has benefitted as has all other counties in eastern Oregon from the movement of petroleum products, namely, gasoline. During this past year approximately 1,200,000 gallons of gas has come into Morrow county at a saving of \$1.00 per ton, or a total saving of \$3,884. In other words, the price of retail gasoline has dropped approximately one-half cent a gallon. This, of course, is only a slight indication of the benefits that are to come.

This work is all being accomplished on a very limited financial budget which is contributed to by county courts of Oregon, county commissioners of Washington and Idaho, port districts and farm and business organizations. Last year the organization operated for a total of \$11,600.39, sub-divided as follows: administration, \$6,550, including salaries, office rental expense, etc.; research work and traffic compilations, \$2,000; legislative, \$1,565, and publicity, \$891.39.

Denny Ranch Favored by Rain

Rain which fell in copious quantities in the Social Ridge area a few weeks ago proved to be a real blessing in at least one instance. The shower fell in greatest volume over the Clyde Denny ranch where small rivulets cut ditches in many parts of his fields. None of the ditches proved deep enough to cause damage and a little smoothing over placed the land in condition for seeding.

Denny wasted no time in preparing the land for seeding and in getting the seeding done. Result: His grain is up and making a nice stand. He set the drill for depositing the seed at three-inch depth and finds the results satisfactory.

Plans Progress for Pioneers Reunion

Plans are progressing nicely for the annual pioneers reunion to be held at Lexington, Saturday, October 21, announced Mrs. Anna Keene, chairman of the committee in charge, when in the city the first of the week.

Included will be the big basket dinner at noon that has been the center of attraction in past years. An entertainment program will be presented in the afternoon, with old-time and modern dancing in the evening.

JOINS PHELPS HOME

Howard P. Shattuck of Portland, licensed embalmer, is now in the employ of Phelps Funeral home. Mr. Shattuck is a graduate of Cincinnati School of Embalming.

Widweek services:
Tuesday and Thursday, 7:30 p. m.
Everybody welcome.

Animal Industry Expanding, Says Chief

"There are many who believe that Oregon's agricultural future for the next several decades rest squarely upon the further development of the animal industries based upon a significant and necessary land-use adjustment," said P. M. Brandt, chief in animal industries at O. S. C., in discussing this question recently over KOAC.

"Taking everything into consideration, it would appear that the animal industry of Oregon, including chickens, turkeys and fur farms as well as other domestic animals, is on a pretty sound basis. It is pretty well balanced up with the feed supply but looking forward to expansion as rapidly as land-use adjustments can be made to permit profitable production in increasing numbers."

New Marketing Study Starts, OSC

A new cooperative research project, directed toward assisting agricultural marketing agencies with their financing problems, has just been established at the agricultural experiment station at Oregon State college. On this project Oregon sta-

tion personnel will work with the Farm Credit administration on detailed studies relating to the financing of marketing agencies with particular reference to canneries and other food processing plants.

Chief representative of the experiment station on the project will be Dr. D. B. DeLoach, whose transfer from the instructional division to agricultural research was approved by the state board of higher education at its recent meeting. Working with Dr. DeLoach will be N. Fogelberg, senior agricultural economist in the cooperative research and service division of the Farm Credit administration, who has been assigned here temporarily from Washington, D. C.

A third man on the project will be C. W. Peters, who recently completed graduate work in agricultural economics at the state college.

Frank Scholarship Winner Enrolls, OSC

Oregon State College—Included in the new freshman class which will enter here September 25 will be Harry G. Green, winner of the Aaron Frank scholarship in statewide competition last spring. Green, honor graduate at Franklin high school, turned down a proffered scholarship at Princeton university to accept the local one which is limited to Oregon institutions. He will enroll in engineering.

Two other Aaron Frank scholarship winners are already enrolled here. F. E. Joehnke, Canby, 1936 winner, will be a senior in agriculture this year and Cora Belle Abbott, Seaside, 1937 winner, will be a junior in home economics.
