Ag Group Meets at Willows Grange Hall

For the drawing of pin to be given each month, Marjorie Baker was the lucky member. This feature will be continued throughout the year.

A meeting of the subordinate agricultural committee chairmen was held in the Willows hall on Tuesday, Jan. 30 with Irrigon, Rhea Creek, Lexington and Willows granges represented.

Horse Shortage Due if War Continues

If the European war makes much demand on the horse supply in the United States, a pronounced shortage will result, declares Dr. W. H. Lytle, chief of the state department of agriculture division of animal industry.

France has contracted already to purchase in this country 6000 horses for war use, and if the war continues more purchases are anticipated.

The U. S. horse population, already low, decreased further in 1939 due to smaller colt crops, encephalomyelitis and tractor competition. Even if war demands do not develop materially, there should still be an active demand for horses this year because there is increasing stress on horses for recreational use, also replacement will be necessary for a certain percentage of the animals used in farm work.

The country had in the neighborhood of 10 million horses and four million mules as the year opened. The federal farm census of 1935 listed 171,071 horses and mules of all ages in Oregon.
