Washing and Ironing are a SNAP!

...when you own an all-electric home laundry operated with low-cost electricity!

• All you do is boss ... your new electric laundry equipment does the work.

Snap a switch and your new electric washer removes every trace of dirt from a tubful of clothes in 5 to 7 minutes. *Turn a faucet* and out comes oceans of clean hot water to wash and rinse your clothes. An automatic electric water heater, you know, supplies water hot 24 hours a day, without any attention. An electric ironer turns out professional-looking work while you sit and guide through the clothes. *You're through in half the time*, and you are not tired out, either.

Electric laundry equipment is very reasonably priced and costs little to operate because *Pacific Power & Light Co. electricity is cheap.*

New Electric Washers

Trust your most delicate fabrics to a modern electric washer! While the amazing new washing action is faster, it's gentle. You'll save wear on your clothes if you replace that "tough" old washer with a 1940 model.

Electric Ironers

Why stand up and push and lift a heavy iron for hours every week? Sit down at a new electric ironer, arrange your clothes on the machine, push a button or lever and the machine does your ironing—just the way you want it.

Electric Water Heaters

All the hot water you want for laundry, shaving, dish washing, cleaning or bathing is yours when you install an electric water heater. No more firing up a furnace or range, lighting a heater, or waiting for the tank to heat. An electric water heater is entirely automatic. Install it and forget it.
