Chevrolet Builds Its 900,000th 1940 Car

Here is the 900,000th car of Chevrolet's 1940 model production, as it left the assembly line at Flint, Mich., June 12, less than one month after No. 800,000 was completed. Beside the car are M. E. Coyle, general manager of the Chevrolet Motor Division (left), C. E. Wetherald, general manufacturing manager (right), and Arnold Lenz, assistant manufacturing manager, who were present in the plant when the car was produced.

"Chevrolet has built 300,000 cars in less than three months," Mr. Coyle pointed out. "The 600,000th of these models was built on March 21, the 700,000th on April 16, the 800,000th on May 13, and the 900,000th on June 12. This production rate closely parallels the consistently heavy sales volume since the introduction of the 1940 models last October, sales during March, April and May alone totalling 307,345."
