Callers Sunday at the E. B. Wattenburger home were Mrs. Russell Moore, Mr. and Mrs. Marion Finch and daughters, Mr. and Mrs. A. E. Wattenburger, Mr. and Mrs. Clayton Ayers and family.

Mrs. Gladys Corrigan remained in Portland for treatment. The last report is she is not feeling any better.

Mr. and Mrs. Russell Moore expect to leave Thursday for a ten days trip to Seattle, coast points and down to Rainier, Ore., to visit Mrs. Moore's parents while away.

**Lock Cars Securely  
in Summer Months**

Motorists on tour are among the most frequent victims of thieves who pilfer from parked cars, according to the Oregon State Motor association. Usually well filled with luggage, garments, and other valuables, tourist cars are an inviting field for the attention of thieves, it was pointed out.

Tourists as well as other motorists with valuable contents in their cars should park in public garages rather than on the streets, the motor association suggested.

"The hundreds of thousands of dollars lost each year by motorists because of theft results largely from failure to lock cars and close all windows securely," the statement continued.

"In addition to closing all windows and setting the catches on all doors before locking the car, the motorist should also see that the

windshield is securely fastened, particularly when valuable baggage or packages are left in the automobile.

"Where it is not possible to close the car securely it is wise to take all valuables from inside the car and lock them in the trunk or luggage compartment.

"Always see that the spare tires and other accessories are of the type that are either locked or permanently attached to the car.

"When placing the car in a public garage, although articles are usually

safe in the hands of those of recognized standing, be sure that pocket-books, jewelry, vanity cases and the like are not exposed to possible theft."

**DRAGGING BRAKES**

All the wheels of a car should turn freely when the brakes are released, according to the emergency road service of the Oregon State Motor association. Brakes which do not release entirely and therefore drag, cause the engine to labor and

naturally tend to reduce gasoline mileage.

**BROKEN GEAR**

A thumping noise in the rear of a car may be caused by a broken gear tooth and should be promptly investigated before additional damage occurs, according to the emergency road service of the Oregon State Motor association.
