**HOW MUCH IS
\$887,690?**

...I'll explain!

★ Pay for 2500 soldiers

"The \$887,690 paid in taxes last year by Pacific Power & Light Company is just about enough to pay \$30 a month for a whole year to 2500 American boys now being called into military training camps.

★ 750 more trucks

"Mobility is the key to present day troop movements, and the company's annual taxes would buy 750 army trucks of latest design to transport nearly 10,000 troops.

★ 127 planes

"Taxes paid by Pacific Power & Light would build 127 planes for use at training fields where pilots are gaining experience necessary to give America a strong air defense.

★ And next year we'll pay more

"Along with all other taxpayers, we'll have to carry an even larger tax load next year to help pay the bill for national security in a world at war. If we didn't have to pay these taxes we could automatically cut electric rates nearly one-sixth. But then you and your neighbors would have transferred to your shoulders the tax load now carried by our business.

"Lower electric rates resulting merely from tax exemptions don't help anyone in the long run. It's the rate reductions you get from a tax-paying electric system as a result of progressive enterprise that really count."
