Dr. Gabrielson Listed As Wild Life Speaker

Dr. Ira N. Gabrielson, who was well known in Oregon before he became chief of the biological survey in Washington, is coming to the state to be the principal visiting speaker at the annual Oregon Wild Life federation conference to be held at Oregon State college, Nov. 27-29. The name of the service headed by Dr. Gabrielson has been changed recently, so that he is now chief of the United States Fish and Wild Life service.

All citizens interested in wild life matters are invited to attend this year's conference, whether they represent any organization or not, says R. E. Dimick, head of the fish and game management department at the college, who is in charge of local arrangements.

William Smith, Portland, president of the federation, has arranged a program which he says will be of general interest. Among the problems listed for discussion are correction of stream pollution, the effect of flood control dams on fish life, recent advancements in wild life management, and proposed legislation affecting fish and game in this state.

The first two days of the conference will be devoted to general meetings, with the annual banquet the evening of Wednesday, November 27, at which Dr. Gabrielson will speak. The final day will be devoted to committee meetings growing out of the conference.

Fruit, Vegetable Movements Grow

More carloads of fruits and vegetables moved out of Oregon in October than in the corresponding month a year ago, and than in the previous month, the state department of agriculture reports following compilation of the federal-state shipping point inspections. The October figures throw the first four months of the current inspection year 1400 carloads above the same period in 1939.

Carlots inspections for October, 1940, were 3,212½ and truck inspections, 1,098 compared with 2,409½ carlots and 1,259 trucklots a year ago and 2,266 carlots and 466 trucklots in September, 1940.

Potatoes led the October, 1940, inspections with 1,207½ carloads and pears were next with 814 carloads. Lettuce shipments, mostly from the Malheur county fields, reached an all-time high of 395½ cars. Carlots of apples inspected numbered 380½ and of onions, 286½.

Increased activity for all divisions is shown in the fourth biennial report of the state department of agriculture, covering the work for the two years ending June 30, 1940. Copies of the report, which shows the importance of agricultural pursuits to the state, are now being distributed.

A new feature is a section devoted to short discussions by experts of newer phases and trends in the Oregon agricultural scene. Other sections are devoted to division reports and show a considerable amount of statistical information.

Financial reports of the department, including both appropriation revenues and expenses and income and outgo from the self-sustaining activities of the department for the biennium are included as is a financial statement of the state fairs held in the two-year period.
