**Lexington Seniors To Present Play**

By MARGARET SCOTT

The juniors and seniors of Lexington high school will present the rollicking three-act comedy, "A Poor Married Man," in the high school auditorium, Friday, March 28, at 8 p. m.

The story of the play takes you to a college town in the middle west, where Professor John B. Wise has married a charming young lady named Zoie. Her mother, Mrs. Iona Ford, insists on accompanying the pair to their new home.

The professor's friends mistake the mother-in-law for the bride, and there the fun begins. Believe us, every one is going to get a bushel of laughs. This play is very exciting because of the natural conditions that arise—and it also has its serious moments—especially when the professor finds out that his wife is going to poison him.

A young college boy named Billy and a pretty reporter add to the professor's growing suspicions. The young bride learns that she really loves Billy and this is the beginning of a surprise and happy ending.

There is never a dull moment through the entire three acts. With grand parts for each member of the cast, brightness and witty sayings are common for Jupiter Jackson, the colored servant.

The characters are developing fast as practices roll into the third week, and the cast as follows promises a full evening of side splitting entertainment:

Professor John B. Wise, Eldon Padberg; Dr. Mathew Graham, Roy Martin; Billy Blake, Duane Johnson; Jupiter Jackson, Don Peck; Mrs. Iona Ford, Lavelle Pieper; Zoie, Doris Scott; June Graham, Jerrine Edwards; Rosiland Wilson, May Rauch.

A group of the H. E. C. ladies spent Saturday at the Thelma Smethurst home sewing for the Red Cross.

The Oddfellows and Rebekahs lodges held a get-together Thursday night, entertaining people from Heppner, Ione, Hardman and Morgan. The Oddfellows also had their initiation that night.

Mr. and Mrs. William Smethurst and Orville Cutsforth motored to Spokane Tuesday morning.

Mrs. Alec Hunt returned home Monday night from a two weeks' stay in Kelso and Portland.

Mr. and Mrs. Lee Sprinkel of Heppner were Sunday guests at the Vernon Scott home.

Mrs. Arthur Hunt spent Thursday in Pendleton.

Mr. and Mrs. Elmer Hunt and Charlotte Chambers spent the week end in Portland. Mrs. Callie Duncan was in charge of Hunt's grocery store Saturday.

Eldora Gleason entertained the Study club at her home Monday evening. Those present were Mary Edwards, Charlotte Chambers, Helen and Emma Breshears, Lorena Miller, Vera Whillock, Alice Foss and Doris Gleason.

A. M. Edwards and Albert were Hermiston visitors Sunday.

George Tucker will again hold services in the Christian church Sunday morning at 11 o'clock. Everyone is cordially invited.

George Peck left Monday afternoon for Salem on business. He was accompanied by Mrs. W. C. Van Winkle and Mrs. Earl Warner who plan to visit relatives in the valley.

Milton A. Fuegy, Union Pacific agent from Portland, was a business visitor in town Friday.

Mrs. Dallas McDaniel of Hardman is visiting her parents, Mr. and Mrs. Dan Way.

Mr. and Mrs. Arthur Hunt and family spent Sunday at the Earl Hunt ranch near Heppner.

Mrs. Rudolph Klinger and Mrs. Julian Rauch were hostesses at a shower Thursday afternoon honoring Mrs. Kenneth Klinger. A large crowd was present and Mrs. Klinger received many lovely gifts.

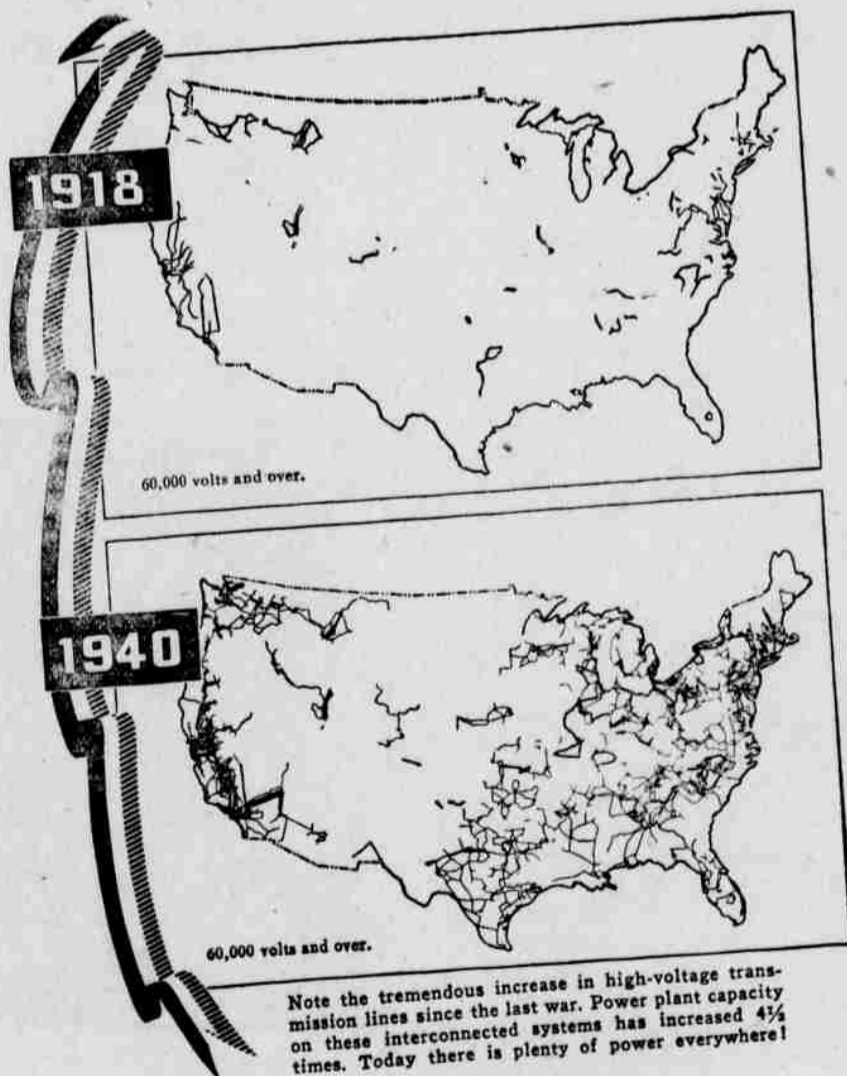

The monthly grange social was held Saturday night at the hall. The evening was spent playing Five Hundred and Chinese checkers.

Dr. J. P. Stewart, Eye-Sight Specialist of Pendleton will be at the HEPPNER HOTEL on WEDNESDAY, MARCH 5th.

**Lights that won't fail National Defense!**

**POOLING of Power Systems means dependable electric service EVERYWHERE!**

★ Electric block signals . . . the "traffic lights" of the great railroad systems . . . speed millions of tons of national defense materials safely over the rails every minute of the day and night.

These signals must not fail! Troops, munitions and supplies must move on schedule!

That is why railroad managers are happy that their electric service comes from the vast interconnected grid of private power systems . . . instead of from small, isolated power plants serving but one city or county.

**POWER GRID HELPS ALL INDUSTRY!**

Supplying dependable electric service to railroad signals is but one example of the important part the power grid plays in national defense. All along the 42,000 miles of electrically controlled tracks new factories are springing up, established plants are working overtime on defense orders. These industries, whether large or small, are getting all the electric power they need, when they need it. The network of transmission lines can bring power from many different sources to supply the abnormal needs of any area.

**WE HAVE 3 TIMES POWER OF AXIS!**

Because private power systems have always built ahead of actual demand, there is plenty of reserve capacity for use in national defense. America today has four and one-half times the electric generating capacity it had in 1917 . . . or three times as much power as Germany and Italy combined.

**PRIVATE CAPITAL BUILT 90%!**

Private capital—and the American spirit of free enterprise—has built more than 90% of these extensive power facilities . . . without subsidy from the public treasury. Only 5% of the nation's power has been created by municipal systems, only 5% by the federal government.

**PRIVATE POWER SYSTEMS ARE READY NOW WITH ABUNDANT, DEPENDABLE POWER**  
*... there is no need to divert one dollar of Public funds from the building of planes, tanks, guns, ships!*
