**TO OUST EARWIGS**

Continued from First Page  
that a general clean-up of the city this fall, to obliterate as many breeding places as possible, followed by either a general poisoning or parasitic campaign next spring, when the earwig population will be considerably diminished, would be the least expensive and most effective course. Conrad has written to the O. S. C. extension service to determine availability of the parasitic flies such as were used in an effective campaign in Portland a few years ago. Cost of poisoning premises of an average sized home would be about 75 cents, Conrad believed, should the poison method be employed.
