

Mustangs Tromp On Baby Bucks, 7-6 In Close Match

Hermiston, Traditional Foe, to Play Here Tomorrow

In a somewhat slow, but exciting game, the Mustangs of Heppner high managed to hold an early lead to nose out the Pendleton "B" squad 7-6 on the loser's turf last Saturday.

The Mustangs kicked off to the Baby Bucks who brought the ball back to their own 30 yard line. After the ball had changed hands a few times, Heppner held the ball on the opponent's 35. On the first play, Barratt, left half, skirted around right end, aided by beautiful blocking, and crossed the line for the Heppner touchdown. Provo, playing his last game with the Mustangs, took the ball on an off-tackle play and scored the conversion point. The score stood 7-0 with Heppner leading.

Pendleton entered the second half with a little more power and zip than had been shown previously. They set a determined drive and finally sent Clancey over for a touchdown. On the try for conversion the Bucks were caught behind the line of scrimmage, the score then reading 7-6 in favor of the visitors.

Heppner was twice more in scoring position. Once, when Bill Snow intercepted a pass to put the ball on the Pendleton 15 yard line, and again in the last seconds before the gun went off when the Mustangs were threatening from the 25 yard line.

In the first half the Heppner line was as strong as a brick wall, holding the Bucks powerless. The Mustangs played hard through, except for a few minutes in the third quarter when the entire Mustang squad seemed momentarily rattled, but they were soon back in the groove.

Captain Claud Snow played a beautiful defensive game, catching the Bucks behind the line of scrimmage several times. Hoyt and Lane, first string left end and tackle, were benched due to injuries, but their alternates played good ball.

Starting the game for the Mustangs were Snow and Scrivner, ends; Drake and Cohn, tackles; Ferguson and Kenny, guards; Christenson, center; Barratt, left half; Padberg, right half; Provo quarterback, and Snow, fullback.

The Mustangs and Bucks each gained four first downs. Heppner was struck very heavily by off-side penalties and neither team had a very heavy yardage gain. The Mustangs intercepted two of the Bucks' passes and completed two out of eight.

Tomorrow afternoon at 3 o'clock, Coach Lyle Swenson's gang will meet the Mustangs' traditional enemy, Hermiston, on the local field. The Bulldogs have a fast, heavy team this year that will make the Mustangs get in and dig, but they promise all spectators their money's worth in thrills.

Not Wheat but Milk and Eggs

In 1918 wheat headed the list of farm products needed for national defense purposes. In today's emergency, however, the emphasis is on foods such as milk and eggs. There is plenty of wheat on hand—in fact, nearly a two year's supply is stored in the nation's Ever-Normal Granary. The U. S. Department of Agriculture urges that farmers, in planning for next year, hold down production of surplus crops such as wheat and at the same time expand production of defense foods needed today.

"You men are doing something you may not care to do, but it is something that every American honors you for doing. It is a mark of distinction upon you as being qualified for this high service. You may go where we older men cannot go. It is to preserve the American way of life, the way of liberty and freedom." Such were highlights of Turner's address. Wheat Average Over 30 Bushels As Third Reported

1 3/4 Million Bushels Under Loan; Taxes and Loans Eased

With loans cleared on 1,791,737 bushels of Morrow county's bumper wheat crop at the close of September and additional applications for loan on another 100,000 bushels, the local ACA office expects the total to be put under loan here will exceed two million bushels. Total loan value of wheat now under loan is \$1,706,879.20, the office reports.

Of the amount under loan 428,087 bushels is in farm storage and the remainder in commercial storage, the figures show.

Compliance reports under the 1941 program show yield returns on 30 percent of the total crop to date, with an average production of more than 30 bushels per acre on the land covered in the reports. These returns indicate an average yield over the entire county of near 30 bushels, the largest average yield on record in the AAA office, and probably the largest average yield ever produced in the county. Since the AAA records were started in 1928 the highest average production in one year was 17.6 bushels, the local office reports.

All returns so far tend to verify the local office's estimate of a total county production of 2,500,000 bushels.

General improvement in economic conditions due to the large crop and good price is reflected in tax payments and the large number of mortgage satisfactions at the courthouse, also in an increased activity in the real estate market.

Report of the county clerk this week showed total turnovers on collections of the current roll of 66 per cent of the total, and collection of both current and delinquent taxes at 75 per cent of the total roll, while the total delinquent taxes had dropped to the lowest figure in many years.

Of the total current roll, \$270,660.41, collections of \$179,075.05 had been turned over leaving a balance to be collected of \$91,585.36, with three months of the year remaining. Total delinquencies as of January 1, 1941, were shown at \$213,852.80, with collections of \$25,969.26, leaving a balance of \$187,883.54.

Recording of satisfactions of mortgages has also received much impetus in recent weeks, as has the recordings of real property transfers.
