Wanda Howell Named To Attend Confab

Wanda Howell, student at Heppner high school, has been chosen as delegate to the seventeenth annual Oregon State High School Press Association conferences to be held in Eugene, Friday and Saturday, October 24 and 25, at the University of Oregon school of journalism.

The conference will open Friday with round-table discussion of specialized phases of journalism. To offer a broad but comprehensive view of journalism is the main purpose of this meeting, according to the sponsors of the conference, the school of journalism, University of Oregon.

The program is divided into four sections: Business managers, news and editorial staffs, mimeographed newspapers, and editors and managers of high school annuals. Friday evening all the delegates will attend a banquet with Dean Eric W. Allen acting as toastmaster.

Speakers and discussion leaders will include members of journalism faculty, present and former editors and managers of high school newspapers, and a number of outside speakers. While attending the conference the delegates will be entertained by living organizations on the campus, and journalism honorary societies.

Present officers of the association are Thornbury Kinersly, The Dalles, president; Peggy Wright, Springfield, secretary (both of these students are now freshmen in the school of journalism); and Gloria Green, vice-president from Oregon City.

Prepare Now for Machinery Lack, Is Farm Advice

Faced with a possible shortage of farm machinery for next year, and inability to get prompt delivery of repairs, Oregon farmers are being advised by Robert Taylor of Adams, chairman of the state U.S.D.A. agricultural defense board to make plans now to foresee their 1942 equipment requirements.

The days when a grower can rush to town and buy a new piece of equipment, or even get the right replacement part on a moment's notice, are probably over for the duration of the emergency, says Taylor. On the other hand, the government is making every effort to see that needed farm machinery and repairs are provided for as adequately as possible through favorite priorities.

NAMED HALL PRESIDENT

Eastern Oregon College of Education, La Grande, Oct. 13.—Kathryn Parker, daughter of Mr. and Mrs. F. S. Parker, has been elected chairman of the council of women's residence hall at the Eastern Oregon College of Education. Miss Parker is a senior in the teacher training division at the college.

NEW CHURCH PROGRESSES

With brick veneering and roof completed this week, finishing work will start the first of the coming week on the new church building for St. Patrick's parish, announced Contractor McCormick when in the city yesterday from Pendleton. The church is being erected on lower Gale street on the site of the old Reid planing mill.

SAM McMILLAN VISITS

Sam McMillan was home on furlough last week end from his air corps ground school work at Mather field, near Sacramento. He told of his experiences at the Elks lodge session last Thursday evening, saying that he was well satisfied with his work and was looking forward to advancement.

EXAMINER HERE OCT. 23

A traveling examiner of operators and chauffeurs from the secretary of state's office will be in Heppner on Thursday, October 23, between the hours of 10 a. m. and 4 p. m. at the city hall. All persons wishing permits or licenses to drive cars are asked to get in touch with the examiner at that time.

Washington, D. C., Oct. 16.—Some idea of what the future has in store may be glimpsed from the ultimatum of SPAB which holds from non-defense needs a long list of materials. It is a drastic order, full of significance that will not be fully realized for a few months. SPAB is preparing for a long war and hoarding for defense every ounce of metal that can possibly be spared. The salvation of Oregon is that most of the large projects, such as reclamation, have been given a defense status.

Neither progress on Deschutes reclamation project nor Willamette valley project will be affected, as matters stand. But no more reclamation projects will be started until after the war. Following OPM's dictum, the director of the budget has turned his face against harbor development and has turned down, as a sample, proposed improvement of Yaquina bay. There will be nothing new on the Oregon coast and there may be some curtailment of maintenance work, although army engineers in charge of navigation will fight for dredging and keeping rivers and harbors from shoaling. This will be necessary because of the fleet of navy shore boats which will be stationed on the west coast and must have access to the harbors.

The lid is clamped down, or will be, on highway construction. OPM says to hold back road work until the next depression. However, military roads will not be interfered with. Funds will be made available to wipe out bottlenecks on the Pacific highway and possibly The Dalles-California highway, and some means of crossing Columbia river without going to Vancouver in order to use Evergreen highway on the Washington shore. Improvement of bridges on military roads to sustain the weight of 60-ton tanks will be undertaken, although only the first of these tanks (make 2 miles an hour) has been delivered to the army. Materials for these military roads are strictly defense, but for other roads no material will be permitted.

OPM has upped the price of zinc, which will cost the government millions of dollars more a year in brass for shell casings. For a trifle of the added sum the government must pay, OPM could recommend development of zinc ores in the Oregon area. All efforts to convince OPM consultants that Oregon can produce thousands of tons of zinc and thus materially aid the defense program have failed. There are three districts in western Oregon which are potential large producers and require only \$1,500,000 for a smelter.

The new aluminum plants in Oregon and Washington will not be in a productive stage until next spring. Meanwhile, the Truman senate committee investigating defense costs is after Jesse H. Jones, secretary of commerce and head of RFC, and wants to know all the particulars of his contract with the Aluminum Company of America (plant at Vancouver, Wash.) which Senator Truman has declared the "rottenest" contract the government has ever made. This contract and collateral matters dealing with aluminum will be thoroughly aired before the committee finishes its probe.

Dr. Paul J. Raver, Bonneville administrator, has been given class A priority for copper transmission lines to the plants at Tacoma, Spokane and Troutdale. Heretofore he has used only aluminum wire, as it was cheaper and lighter than copper, but aluminum is now needed for bombers and interceptor planes. Copper is scarce, too, but if OPM wants aluminum it must see that Bonneville has copper.

Oregon came within a ace of being deprived of the aluminum and fabricating plants and all that saved this new industry was an ultimatum

Many Seed Make Dry Land Lawns Possible

Oregon produces such a variety of grass seed that species are available that do very well in establishing lawns in areas where no irrigation water is available, points out Harry A. Scoth, federal agronomist at Oregon State college.

The kind of grass to plant in such a situation depends somewhat on soil conditions and other factors. For a soil that gets exceptionally dry and warm during the summer months Scoth recommends the use of either standard or Fairway crested wheat grass. The Fairway has a somewhat lower and spreading growth habit.

A combination of Fairway crested wheat and bulbous blue grass may be an improvement over crested wheat grass alone, says Scoth, because bulbous blue grass makes a growth during the fall, winter, and early spring, when crested wheat is more or less dormant. Where water is available for irrigation east of the Cascades, Kentucky blue grass is one of the most satisfactory, although creeping red fescue or chewing fescue may be used successfully, Scoth adds.

In buying lawn grass of any kind it is safest to buy according to the name of the grass desired, as lawn grass mixtures seldom contain the sorts best adapted to specific locations.

from Senator McNary that they must be located in Oregon. Plans were to give them to Washington.

There is a determined fight in the house committee on agriculture to amend the farm credit law, a requirement of which is that when a farmer borrows he must subscribe a percent of his loan for stock in the organization. In effect it is the same as paying a commission for the loan and has never been popular with farmers. The committee is conducting hearings on a proposal to do away with this compulsory subscription for stock.

Spokesmen for western states farmers have come to Washington to meet with representatives from other sections to outline a campaign against having a ceiling placed on farm products, as is recommended by the price control officer. Originally, farm prices and wages were not contemplated in the program, but there is now demand for a lid on farm products although not touching wages. Farm representatives have made a canvass of house and senate members and are providing the farm bloc with arguments to be used in debate. Practically every member from Idaho, Oregon and Washington wants as little restriction on farmers as possible.

DEFENSE BOND

Quiz

Q. How do I get the highest return on my investment in Defense Savings Bonds?

A. By holding each Bond for its full term of years you will secure the full maturity value. A Defense Savings Bond of Series E increases in value 33 1-3 percent if held for 10 years.

Q. Is the Government concerned over whether I buy my Defense Savings Stamps at post offices, banks, savings and loan institutions, retail stores, or elsewhere?

A. No. The Government is interested in having as many persons as possible take a hand in the National Defense Program. Toward that end the Treasury is making Bonds and Stamps available for purchase in the largest number of places possible.

NOTE: To buy Defense Bonds and Stamps, go to the nearest post office, bank or savings and loan association; or write to the Treasurer of the United States, Washington, D. C. Also Stamps are now on sale at retail stores.

ENROLLMENT DOWN

Oregon College of Education, Monmouth.—An enrollment of 340 students completed the total registration for the fall term at the Oregon College of Education. Although this is a decrease of approximately 12 per cent, the lowered enrollment can be expected because of the withdrawal of many people, particularly men students into the army and into better paying fields. A large number of the new students are transfers from other colleges. Morrow county is represented at the Monmouth college by Katherine Griffith, a senior, from Morgan.

CALL FOR WARRANTS

Outstanding warrants of School District No. 25, Morrow County, Oregon, number 48 to 76 inclusive, will be paid on presentation to the district clerk. Interest on said warrants ceases October 18, 1941.

FLOSSIE COATS, Clerk, School District No. 25, Boardman, Oregon.

WE NEVER PULL OUR PUNCHES

GOOD PRINTING is not only our business but also a hobby of ours. We never pull our punches but give all we have on every job. We are equipped to assist you in laying out the job with correct type faces, proper paper stock and with illustrations, if desired.

We print business stationery of all kinds, letterheads, invoices, bill heads, blotters, order blanks, envelopes, folders and ruled forms. Also catalogues, broadsides, booklets, posters, show cards, etc., etc. Our prices are most reasonable and our service is always prompt.
