New District OPA Office at LaGrande

The LaGrande office of the OPA—covering a 40,000 square mile district in 12 eastern Oregon counties—was opened officially Monday, June 22, by District Manager Harley H. Richardson, and is located in the Bohnenkamp building on Jefferson avenue. The Draper School of Commerce formerly occupied the site.

Wallowa, Union, Umatilla, Morrow, Gilliam, Sherman, Wheeler, Grant, Baker, Harney, Malheur, and Crook counties will be serviced by the office.

The district comprises about one half the area of the state of Oregon, and has a population of 118,897.

M. Brakemeyer of Baker will be assistant manager. E. M. Powell, formerly of Baker and lately Montgomery Ward manager at Walla Walla, will be chief of the pricing division. Henry L. Hess, La Grande man who was gubernatorial candidate four years ago, is chief of the legal department. J. L. Ingram, also well-known here, is chief legal inspector.

The office here will handle all matters pertinent to the OPA for all of the above named counties.

Mr. Richardson states that it is the intention of this office to be of real help and service to the people of eastern Oregon during the emergency, and to cooperate with both the consumer and business man in helping to adjust all price and rationing matters concerning the war effort. He asked that people in the district watch their local newspapers for additional information as it is released.

Announcements of additional personnel in the La Grande office will be made by Mr. Richardson in the near future.

Harold Scoubes of Pendleton is relieving as manager at the local Safeway store this week while Mr. and Mrs. Mel Serle are enjoying a vacation in Portland.

1. Call your closest rural fire warden.
2. Give him the following information:
 - a. Kind of fire (dwelling, barn, wheat, grass, etc.)
 - b. Location of fire (name of farm-direction and distance from well known landmark, etc.)
 - c. Size and seriousness of fire.
 - d. Kind and amount of fire fighting equipment on hand.
 - e. Kind and amount of equipment needed.
 - f. Number of men needed.
3. Wardens only will call for outside help or sound general alarm calls.
4. General alarm calls on all telephone lines shall be long-short-long with a distinct pause between each.
5. Do not answer emergency calls. Remove receiver from hook and listen.
6. Do not remove receiver from hook until ring is completed—to do so prevents clear ring to other phones.
7. Keep a walking plow and shovels on every combine.

southern state in company with her mother, Mrs. Truman Babb, and Mr. Babb, Mrs. Crawford visited her brother, Martin King, at Malibu Beach.

Mrs. Raymond Ferguson entertained the Wednesday club with a dessert bridge at her home this week. Mrs. Stephen Thompson won high score, and Mrs. J. G. Thomson, Jr., won second.

Mrs. Fred Mankin returned from Spokane last week end, accompanied by her daughter, Mrs. Alvin Bunch, who will make her home with her parents while her husband is on overseas duty. Miss Marion McElroy of Spokane, is also visiting at the Mankin home.

8. Cans of water, sacks, and shovels should be on every trap wagon.
9. Avoid getting excited at all times.

FIRE PREVENTION RULES

1. Dispose of all fire hazards around buildings now.
2. Burn fence rows and road right-of-ways as soon as possible. (Notify your warden before doing any burning—this is very important.)
3. Plow or cultivate fire guards around grain fields.
4. Do not start fires that cannot be controlled or put out before dark.
5. Check all exhaust pipes on trucks and tractors for leaks before harvest begins.
6. Keep ladders, shovels, buckets, and water handy around all farm buildings if you do not have pressure water systems.
7. Oily rags, accumulations of paper, matches in childrens' hands, wet hay, careless smokers, leaky pipes, and poor electric wiring are always fire hazards.
8. Approximately 90 percent of all rural fires could be prevented—let's do it.
9. THINK Fire Prevention, TALK Fire Prevention, and PRACTICE Fire Prevention.

Preparing for the worst, but hoping for the best, the state forestry department, private fire associations and the forest operators have assembled equipment sufficient to outfit 39,000 men in the event of an extreme fire emergency. As the Salem warehouse the state department has fire hose, tools and equipment ready to outfit 2500 men; the 13 fire associations by pooling their resources could outfit 11,500 men and private industry, 25,000 additional firefighters. While these numbers are reassuring in our aim for a green Oregon, it is well to remember that once a fire has taken to the tree-tops the firefighter is not only helpless but his very life is endangered. What fire agencies hope for is better public cooperation in reporting fires so they can "hit 'em when they're small."
