WHEAT INSURANCE PROTECTS AGAINST ALL WAR DAMAGE

Federal crop insurance offers protection against all pests—and that includes Hitler, Hirohito and crew. Oregon wheat growers are advised by the state AAA office.

The farmer holding a policy from now on will be compensated for unavoidable losses caused by bombing or other war damage under the terms of the all-risk crop insurance just as he would be for losses caused by drought, insects, plant disease, wind, fire, flood or hail.

This protection will be extended automatically to the holders of 1942 policies on 6098 Oregon farms, and will be continued for farmers insuring their 1943 crops during the next several months.

College-Military Combinations Offered

Oregon State College—At least eight different types of combination college training and war service opportunities will be open to men students here this fall, according to a summary of these just released by E. B. Lemon, registrar. Under these programs a student actually enlists in one of the branches of the service but is assigned to the college for from one to four years, depending on the program selected and his class in college.

Students entering for the first time this fall have three main programs from which to choose. First is the army enlisted reserve, for which a quota will be set. This leads to regular army service following completion of a college course, with opportunity to attend officer candidates' school. Next is the army air force enlisted reserve, which will also be governed as to numbers by a quota not yet assigned. It leads to subsequent training for a second lieutenant commission.

The third opportunity and one which is open only to freshmen and sophomores between the ages of 17 and 19, inclusive, is the navy V-1 program. Students enlisted in this are given an examination at the end of the second year, which permits them to go on either into the V-5 naval air force program or V-7 officers' training program. Those who withdraw, or fail to qualify in the examination, go into the navy directly after two years in college. Students do not enlist in these

three programs until they actually enter college this fall.

Other programs open to advanced classes include the navy aviation V-5 and the navy V-7 programs, the marine corps candidates' class, the navy volunteer reserve, open only to senior engineering students; and coast guard reserve cadetships, open to seniors with required mathematics training.

Entering any of these programs is entirely voluntary, as a student is free to enter college as usual and await assignment through the selective service plan, Lemon explains. ROTC training will also be continued, with two advanced years leading directly to army reserve commissions.

SAFEWAY Homemakers' Guide

NUMBER 51 ★ Tips worth reading on menu planning ★ A list of foods you'll save money by checking ★ Take part of your change in War Stamps

Want to know how to save lots of time in your food shopping?

The main answer to the above question is—"Plan your menus ahead of time". These few tips suggested by the Safeway Homemakers' Bureau, should help a lot.

Tip No. 1—Plan menus several days in advance, a whole week if possible, so you'll see your food picture as a whole. Then you can check to make sure you've included plenty of variety and a balance of foods needed for good nutrition.

Tip No. 2—For good nutrition, each day's meals should include at least a pint of milk for adults, a quart for children; an egg per person, or at least 3 to 4 eggs a week; some enriched or whole grain bread or cereal; a tomato or citrus fruit or their juices; another serving of fruit; at least two servings of vegetables besides potatoes, one preferably green, leafy, or yellow; a serving of meat, fish, chicken, or sea food; some butter or vitamin A fortified margarine; and whatever desserts and special treats you like.

Tip No. 3—Even the best food tastes better served attractively. Be sure to include in every meal a pleasing contrast of shapes, colors, and textures, as well as contrasting temperatures and flavors.
