Early Marketing Meat Animals Urged Here

While current meat shortages reported from some parts of the country have not occurred to any important extent in Oregon, the present situation holds an element of warning to livestock producers, points out R. G. Johnson, head of the department of animal husbandry at Oregon State college.

In Oregon, as well as elsewhere in the country, farmers are raising the largest number of meat animals on record, with marketings normally scheduled to reach an all-time high late this fall and in early winter. Current shortages in some parts of the country are caused by an unusually large export and domestic demand for meat supplies plus some local dislocations caused by price control.

Because of the current demand and favorable prices Oregon cattlemen could well afford to move some stock such as fat cows to market in greater volume than usual this summer and early fall so as to avoid a possible congestion in slaughtering and shipping facilities later on, says Johnson.

The same holds true for hog raisers who may have hogs on hand now that could be hurried along to good size and finish by heavy feeding. Present price ratios are such that heavy feeding of a well balanced ration is justified and will return good profits, Johnson believes.

Thus, rapid forcing of Oregon meat animals to good size and finish will help consumers and producers alike by relieving shortages and avoiding later congestion.

Dr. J. P. Stewart, Eye-Sight Specialist of Pendleton will be at the **HEPPNER HOTEL** on **WEDNESDAY, AUGUST 19th.**

LOW FEED WHEAT PRICES SET FOR NEW AAA PROGRAM

Wheat prices for disposal of surplus government-held grain for feed have been announced for Oregon at two levels in a new program just authorized under terms of recent congressional action, the state AAA office at Corvallis has just announced.

For August the two price levels from her summer garden for all, and a large can of raspberries, which was drawn for and won by Mrs. Edgar Parker.

Mr. and Mrs. George Corwin and family have taken the Anna Q. Thomson home on Baltimore street, formerly occupied by Mr. and Mrs. George Howard. Mr. Corwin is the new school superintendent at Heppner. Mr. and Mrs. Howard have moved to Portland.

are 90 cents per bushel for all counties east of the Cascades except Hood River and Klamath, and 94 cents for these two and all counties west of the Cascades.

These prices are on the basis of whole wheat delivered in each county, explained N. C. Donaldson, administrative officer. Purchasers desiring cracked or ground wheat will have to get it processed at their own expense.

Prices for September and October will be at an advance of one-half cent per bushel each month. Any undelivered or resealed farm-stored wheat of the 1941 crop may also be purchased under the program for feed.

Availability of this wheat at prices approximating 85 per cent of the corn parity price presents an attractive opportunity for farmers to convert low-priced feed into high priced meat, eggs, and dairy products, AAA officials point out. Secretary Wickard is urging the movement of at least 75 million bushels of surplus wheat into feeding channels before the movement of new crop corn gets under way about October 1. Every bushel moved now relieves the storage situation that much.

Feeding experiments and demonstrations by Oregon State college over a number of years have demonstrated that wheat can be used successfully in feeding or fattening all types of livestock. Information on best methods of feeding wheat
