**On Every Front**

... General Electric equipment is fighting with America's land army. From the rolling kitchen to the front line, electricity works for victory.

1. In the factory electricity stitches the seams of tank armor, and on the battlefield it controls the operation of these spearheads of modern combat.

2. In induction center and field hospital, the X ray helps safeguard the health of our fighting men, aiding in the diagnosis and treatment of disease.

3. Far from the usual power sources, mobile power plants supply electricity for 800,000,000 candlepower searchlights by which a newspaper can be read 12 miles away.

4. Blitz war requires swift communications! On the soldier's back, in field and sky, radio co-ordinates the striking force of American army planes, guns, and tanks.

General Electric believes that its first duty as a good citizen is to be a good soldier.
