**Nationwide Molly Pitcher Tag Day**

Washington, D. C.—On August 4th, Molly Pitcher is stepping out of the pages of American history to sell War Bonds and Stamps. The gal who carried water to thirsty soldiers during the blistering Revolutionary Battle of Monmouth and took over her husband's cannon when he was wounded, has long been a symbol of the heroism of American women.

In her honor, brigades of modern Molly Pitchers will take their stands on nation-wide Molly Pitcher Day at street corners, building entrances, and in public places to sell the bonds and stamps that back up our modern fighting men.

A red-white-and-blue Molly Pitcher Tag will be given to everyone who purchases a bond or stamp on that day. Members of the American Legion Auxiliary, and of the Independent Food Distributors Council unit of Molly Pitchers, will aid and augment local Women's War Savings Staffs to make up the volunteer sales force. They will use water pitchers to hold their supplies of tags and War Stamps. The slogan on the tags will read "Fill the Pitcher with Bonds and Stamps on Molly Pitcher Day," and the goal of the sales force will be to "tag" the total population.

**Enough to Go Around**

Now, for the first time in years, both farmers and manufacturers can work for the biggest possible yield without thinking about the market. This year they can sell all they can produce.

As things look now, this condition is due to keep up for some time, but we can't count on its lasting forever. Certainly nobody wants a prosperity built on war! So it's high time that everybody concerned—and that is everybody—gave some thought to keeping things running after the war.

You're busy, we know. So are we. The important thing right now is seeing that there's enough of everything to go around. But we've been devoting a little atten-

tion to the problems of the future, too. We feel that the people who have the producing job to do can contribute a lot to the solution of those problems.

And we hope that you, too, busy as you are with growing more food than this country's ever produced, will be turning these problems over in your mind. For if America's farmers and manufacturers, working together, can't find a way to keep the richest country on earth producing enough for everybody, and let the producers make a living in the process—if they can't, why then, who can?
