Every one invited.

She plans her shopping to save gasoline...

USE WHAT YOU NEED ...

BUT NEED WHAT YOU USE!

The WPB asks everyone to help

save by avoiding waste. But don't

endanger your eyes, your safety

or health. Follow the rule of "Use what you need ... but be sure you

need what you use."

but-HEATS THE ELECTRIC IRON SON TO PRESS A HANKY

been cheap and abundant here. So, why should any one be asked to "think twice" before using a little electric iron? What difference could it make?

Well, this is wartime. It does make a difference now. A big difference! Any waste of electricity wastes other things which are not so plentiful.

It means a waste of copper, steel, brass, tungsten and all the other critical materials that sooner or later will be needed to repair or replace electrical appliances. It means a waste of manpower, fuel and transportation, and it wastes money!

That is why Uncle Sam asks you to use electricity wisely. That is why you are expected to plan your schedules in business, home and industry to get the most good with the least amount of waste and wear from your electrical equipment.
