

FEWER DEER AND ELK SLAIN. FORESTERS SAY

Foresters operating in the Heppner district hold to the belief that not more than 50 percent of the annual kill of deer and elk was made this year.

Reason for a smaller kill is attributed somewhat to the fact that game animal ranks have been decimated by disease, starvation, ticks and slaughtering by predatory animals to virtually 50 percent of the normal count, it is estimated by the foresters.

Wild life in the mountains will be further depleted this winter with a rounding up of 40 to 50 head of wild horses. The last of what once was a great herd.

He was arranging to leave Heppner at once but reconsidered and decided that his services were needed as badly here at present as elsewhere. It is understood that he and his family will give up their Gale street residence and occupy an apartment in the rear of the shoe store building which O. M. Yeager is making over for them.
