interest payments needed by widows, orphans and others dependent using artificial means to force down is unfair. Government bonds dominate the high-grade field. Corporates are being called in increasing amounts. Institutional investors and trustees have to bid very high on the few remaining corporates or buy Governments. In view of the relatively greater risk in corporates, I favor confining high-grade bond purchase to the E, F and G War Series, preferably E's. Otherwise, hold cash. Municipals are too high.

I expect no near-term shift in interest rates. They may remain low as long as government financing must be carried on in large volume or as long as restrictions are placed upon the expansion of business to meet civilian demands and the money hoard continues to grow. When the readjustment comes the investor should not be tied up in long-term, low-coupon bonds. Current yields on better-grade issues have been forced down too low. Investors looking for liberal income are, therefore, buying cumulative preferreds. Such issues are also in favor with investors skeptical over the general trend of common stocks; but the field is very selective. My usual advice is to buy only first mortgage bonds or else common stocks of companies with no cumulative preferreds.

### TAXES

There may be a small increase in 1944 taxes. This increase will hurt only a few industries through increased excise taxes. Income taxes, inheritance taxes, gift taxes, and probably corporation taxes will remain about where they are or lowered. Furthermore, 1944 may be the last year of tax misery. Taxes should begin to decline in 1945. Investors should especially keep in mind that—when excess profit taxes are eliminated—many corporations can make more money and pay more dividends with much smaller gross earnings.

### POSTWAR JOBS

Men and women who left jobs to enter the armed forces should have no trouble getting jobs when they return. Those who entered the "armchair" forces at Washington or

elsewhere may have real trouble in getting postwar jobs. Men who were unemployed when they entered the armed forces will get postwar jobs based on their war record and behavior. Character and habits will be an important consideration. Men and women who left employers in the lurch to get more money or thrills may be left "high and dry" when the war is over. There will not be a good job for everyone after Germany cracks. In fact, there will begin to be unemployment when Roumania, Bulgaria or Hungary give up, which I expect fairly soon.

minimum price of \$10.00, cash.  
THEREFORE, I will on the 8th day of January, 1944, at the hour of 10:00 A. M., at the front door of the Court House in Heppner Oregon, sell said property to the highest and best bidder.

### POLITICS AND INFLATION

Unless Germany collapses before August, Roosevelt will be re-nominated and probably re-elected. It looks now as if Willkie would be nominated if the Republican leaders believe Roosevelt has the election in the bag. This would be a good way of getting rid of Willkie forever. Another possibility is that Willkie may accept second place on the Democratic ticket. The Republicans will put their efforts upon Congress. In November 1944 they should secure a good majority of the House and six more Senators. When I look further ahead, 1943 seems now like a good Republican year with Gov. Dewey the victor, in case Willkie is not already president. During the 1948-52 term will come the next depression followed by a return of the Democrats in 1952. Then there will be more socialistic experiments and the real inflationary period. In the meantime, we will have slowly creeping inflation until 1948; but nothing radical. After Roosevelt is re-elected with a vice president satisfactory to him, I should not be surprised to see him resign to accept the head of the new world organization, whatever this may be. This could happen as soon as Japan is whipped, possibly in 1945.

### HOW LONG WILL WAR II LAST?

Intelligent forecasts of 1944 business should be based upon some assumption as to the length of the war. If Germany is to crack within a short time, 1944 may be a very different year than if Germany should hold out until after our presidential elections in November 1944. Germany may collapse early in the year, but consider the following:

(1) Churchill is very close to Roosevelt. He desperately wants him re-elected. Knowing that only a continuation of the European conflict through October 1944 will assure this, he is not hurrying the second front.

(2) As the Republicans have not yet insisted upon "unconditional

surrender," the German and Japanese people think their chances might be better with a Republican president—which is a temptation for them to hold out.

(3) Stalin is definitely waiting until after Nov. 6, 1944 before making certain decisions, and this will delay Germany's collapse.

(4) Altho the Washington New Deal group might do nothing to prolong the war merely to insure themselves another four years of power, yet they surely would not be adverse to others doing so.

(5) Generally good war news should feature 1944. The battle-hardened Russians should continue to drive the German hordes back. As we enter 1944 the war has rounded second base and is on the way home. As, however, I stated in my 1942 and 1943 annual forecasts, we should not expect an ending of the war until gas, chemicals or bacteria bombs are used.

All of the above may be upset by the death or serious illness of Roosevelt, Churchill, Stalin, Chiang or perhaps even Hitler in 1944.

### NEEDED: MORE RESEARCH AND RELIGION

Businessmen are faced with three vitally important questions: (1) Is it time now to give up seeking war contracts and prepare plants for civilian goods output? (2) Should subcontracting be reduced by approximately 50% so as to be ready for civilian goods production? (3) Is all-out war production to utmost capacity the best course to pursue? My advice is: Continue to take all war subcontracting you can get provided it will not tie your plant up beyond election day next year. Stop further expansion plans now. Work research and postwar planning departments overtime. Give orders now for reconversion equipment.

Finally, 1944 will see a continuation of the conflict between those two philosophical theories which are splitting civilization today. These may be expressed by the eternal question of whether man (1) is a spiritual being to be guided by the Ten Commandments; or (2) is an evolutionary animal permitted to follow the rules of the jungle even when possessing a college diploma and dressed in a tuxedo. If our first assumption, the one for which our churches stand, is adopted as a goal, the coming year can be the beginning of a glorious future. If the second, which too many educators are teaching, is allowed to grow, then World War II may have been in vain. In the end, spiritual forces must overcome the material forces or civilization is sunk. The hope of a better postwar world lies with greater research and more religion.
