WOOD HAS A JOB IN PEACE... as in war

SURE, wood can take it.

Right now, it's doing its biggest job in history. Its lumber is housing tens of millions of soldiers, sailors, marines and war workers. Its plywood is in swift bombers and in more types of construction than can be mentioned. Its structural timbers have gone into great factories and vast hangars. Its cellulose provides the paper and plastics for myriads of war uses.

Grueling tests of war are preparing wood for its greatest job in peace. We will end this war with the most serious housing shortage in our history, and, as soon as the conflict ends, wood will go to work to provide the homes we need.

Buy only what you need!

That is good advice to which we add:

Buy it here and you will save both stamps and money.

The reason---quality goods are both healthful and economical.
