You have a Cash Dividend coming on Your Electric Bill!

● Early next month you will receive a check like this for your share of a \$300,000 "rate dividend" to all PP&L electric customers. The amount of your dividend will be approximately one-half of your average monthly electric bill—and it will be paid by *check* and not merely a credit on your next bill.

We are taking this unusual step because there is an unusual condition to be dealt with. The war is causing an abnormal demand for electricity at many places on the PP&L system. Just as a few examples, we are serving new war industries, commercial businesses, air fields, training camps, naval bases and supply depots.

And besides serving electricity to all our *regular* customers, PP&L has been called upon to furnish electric-

ity to a sudden influx of *new* families in the neighborhood of all these war-caused activities. All this has resulted in an unusual increase in our total volume of business.

You and all the other users of our electric service have a right to share in the benefits of this extra business while it lasts. The question has been "What is a sound way of distributing these benefits?"

After thorough investigation, the Washington Department of Public Service and the Oregon Public Utilities Commissioner have approved this "rate dividend" plan as a fair and practical way to meet a war-time situation.

The check you receive as your share of this \$300,000 customer-dividend will reduce further the cost you pay for electricity—which already is only about half national average.

HOW PP&L RATES HAVE BEEN REDUCED YEAR BY YEAR.....

It was BUSINESS MANAGEMENT that made these reductions in your electric rates, without calling on the public treasury for help. In fact, PP&L has paid constantly increasing taxes in support of Government while rates were being reduced.
