## We have a **NEW** KIND OF BUSINESS

BACK AMONG the hills and in the far places there is a new business in our Country . . . It is a form of agriculture called **TREE FARMING**. Trees are the crop and homes, schools, churches, farms, magazines and all other things we make out of wood are the harvest.

This Company is part of an industry which has set aside huge areas of private forest lands for growing trees . . . a reserve to make continuous the flow of forest products from this Community, to insure the employment of our people, the payment of our taxes, and the well-being of our Community.

**TREE FARMS** are managed and operated by the private forest industries to provide a continuous forest harvest.

## Many Retailers Agree

that present levels can be held through individual effort. Good business in the future will depend on the individual himself. What will happen in the food field after the war is problematic. One of the best methods of measuring the efficiency of a retail food store is on the basis of sales per employe. This can be accomplished only by the cooperation of each and every employe. This can be satisfied with our results along this line. Come in and look things over, even if you do not contemplate buying anything. But you should not put off any longer buying your seed potatoes. Special prices on Irish Cobbler and Early Triumph. We also have some fine Netted Gem seed. Better get your potatoes planted.
