WOOD HAS A JOB IN PEACE ... as in war

The 5th War Loan Is Ahead

Object: To sell sixteen billion dollars worth of bonds—six billions to be raised direct from individuals. Date—June 12 to July 18.

Let's Not Fall Down This Time!

Do you believe in Uncle Sam? Prove it. Let's not get out of step with the boys. The cost of war is running so high that higher taxes are inevitable. At present the daily expense is over \$300,000,000. The United States to date has spent well over \$175,000,000. No wonder we are asked to buy more war bonds!

So buy only what you need and buy the best. We pride ourselves in handling only the best, so come in and stock up. All we ask is a chance to serve you once. We know you will come again.

The champion "blook"—the guy who thinks we should cross mules with cows to get milk with a kick in it.

Central Market

WOOD really needs no introduction to America.

It has built most of America's millions of homes, has given us paper and innumerable other products.

Perhaps you won't recognize wood after this war is over. So many new uses are being developed that it has become known as our most versatile raw material.

The most important fact about wood is that it is a renewable natural resource. We may run out of minerals, but *trees* grow.

Forest industry operators, custodians of our commercial trees, recognize this fact. Harnessing growth, they are using wood today, and producing more wood for the future. A forest isn't a mine, that can only be depleted. It is a farm that can produce forever.

Forest Fact!
Twenty years of growth of new wood in America's commercial forests would be enough to duplicate all the houses built since this nation was founded.
