**Quality**  
is a lot of things  
that add up--

—Big things and big little things, to be exact.

Like emphasizing the slower and more painstaking work of expert craftsmen as against the high speed volume-gear production of novices.

That's the kind of jewelry sold here — made by manufacturers where quality is something more than a high sounding word.

**Terry and the Pirates**

By Milton Caniff

Sure You're Busy,

But - - - -

We know this is a busy time for you. But those boys at the front, your boy and the neighbor's boys, need the things your war bonds will buy . . . So, take time out to write for a bond application blank if you can't go to your local bank or post office. Then send it with a check for your bond order.

**Central Market**

**T**HERE'S a whale of a difference between a broken match and one that isn't.

You *know* the broken match is out. You may not be quite sure about the other.

But *this* is sure:

If a blazing match lights on an inflammable forest "floor", you have the start of another forest fire. In five years ending in 1939, there was an average of 79,069 forest fires in the United States every year. More than three-quarters of them were man-caused.

*All of us PAY for forest fires*

*- - - most of us can PREVENT them*
