IT ISN'T very likely you'll be called upon, personally, to fight forest fires *after* they start.

But there's plenty you can do to fight them *before* they start.

For most of them are preventable. Careless smokers cause a quarter of them. Incendiaries another quarter. Campers cause 6.6%.

Fire in the woods rolls up a national loss of \$30,000,000 to \$45,000,000 every year. New growth in our forests would exceed timber harvested in normal years, if fire losses and other natural hazards were eliminated.

Your help will aid in conserving, for perpetual use, America's most versatile and only renewable natural resource.

Forest Fact!

Logging operations caused less than two per cent of forest fires from 1935 to 1939, according to the U.S. Forest Service.
