What is the Jewelry Manufacturer's Part in This War?

Today they are turning out precision made parts for short wave radio equipment, radar, timing devices, cameras, motors, surgical instruments and bomb sights, meeting their part of America's war burden.

When peace comes—we hope soon—we will have outstanding lines of nationally advertised jewelry. Until then—BUY WAR BONDS!

WOOD HAS A JOB IN PEACE as in war

FAT FACTS *

USED KITCHEN FAT IS A PLASTIC INGREDIENT! THE CLEAR VISION PLASTIC WINDOWS IN OUR FIGHTER AND BOMBER PLANES GIVE OUR FIGHTING MEN A BIRD'S EYE VIEW AND A BULL'S EYE HIT!

REFINED USED KITCHEN FATS ENTER INTO THE CONSTRUCTION OF OUR PLANES IN DOZENS OF WAYS.....

AIRPLANE BUILDERS ARE GETTING A SHARE OF THE USED KITCHEN FATS YOU SAVE AND TURN IN FOR RATION POINTS AND CASH!!

SURE, wood can take it.

Right now, it's doing its biggest job in history. Its lumber is housing tens of millions of soldiers, sailors, marines and war workers. Its plywood is in swift bombers and in more types of construction than can be mentioned. Its structural timbers have gone into great factories and vast hangars. Its cellulose provides the paper and plastics for myriads of war uses.

Grueling tests of war are preparing wood for its greatest job in peace. We will end this war with the most serious housing shortage in our history, and, as soon as the conflict ends, wood will go to work to provide the homes we need.

Forest Fact!
 WPB estimates 11 billion board feet of lumber was required in 1943 for war-time boxes and crates, 6,700,000,000 more than in 1940.
