## Who Buys Most of the Jewelry?

Woman for years has controlled the bulk of jewelry buying. By nature she is instinctively attracted by grace in design, beauty in finish, value and quality.

It is understandable then why particular women choose quality jewelry for themselves and as gifts.

Although complete stocks of jewelry are not currently available, because of war, we invite your inspection of the several items we have in stock.

**WOOD HAS A JOB IN PEACE... as in war**

**WOOD** really needs no introduction to America.

It has built most of America's millions of homes, has given us paper and innumerable other products.

Perhaps you won't recognize wood after this war is over. So many new uses are being developed that it has become known as our most versatile raw material.

The most important fact about wood is that it is a renewable natural resource. We may run out of minerals, but *trees* grow.

Forest industry operators, custodians of our commercial trees, recognize this fact. Harnessing growth, they are using wood today, and *producing more wood for the future*. A forest isn't a mine, that can only be depleted. It is a farm that can produce forever.
