Delmer Crawford is home on a 10-day leave from Camp Parks, California.

Laxton McMurray is having several of the large silver leaf poplar trees on his property cut down. In cutting the first one into length the saw bit into a round loose object in the center of the tree. This proved to be an old hickory buggy spoke about 18 inches long, in perfect condition. It was in a hole four inches in diameter and 20 inches long, which was about four feet from the base of the tree. No opening could be found from the hole to the outside of the tree. The \$64 question now is how did the spoke get inside the tree and how long has it been in there.

# Support the Hospital Measure

Citizens of Morrow County:

You will be given an opportunity Tuesday, November 7, to express your wish regarding the construction and maintenance of a hospital, the same to be financed through the levy of a two-mill tax for a period not to exceed five years. It is the belief of this organization that a large majority of the citizens and taxpayers are in favor of the proposal and will cast their votes accordingly. No one doubts the need of a hospital and it is to clear any misunderstanding relative to the type of institution proposed that this advertisement is published.

Let us make this point clear: The proposed hospital will not be a county poor farm. It will be a MODERN GENERAL HOSPITAL, equipped and staffed to meet all contingencies in caring for the sick and those needing surgical attention. Such an institution should be owned and controlled by the county. Persons coming under the county's welfare jurisdiction will not be housed in the hospital except in cases when medical attention can best be given them there.

In closing it is pertinent to state that a large favorable vote on the hospital measure will be appreciated by the members of the Morrow County Court upon whose shoulders will rest the burden of arranging finances and other details of construction and operation.

**Turn Out and Vote Next Tuesday. Vote 318 (x) YES!**

**SURE**, wood can take it.

Right now, it's doing its biggest job in history. Its lumber is housing tens of millions of soldiers, sailors, marines and war workers. Its plywood is in swift bombers and in more types of construction than can be mentioned. Its structural timbers have gone into great factories and vast hangars. Its cellulose provides the paper and plastics for myriads of war uses.

Grueling tests of war are preparing wood for its greatest job in peace. We will end this war with the most serious housing shortage in our history, and, as soon as the conflict ends, wood will go to work to provide the homes we need.
