PUTS IN STORM DOOR

Harvey White has installed a storm door at the front of his place of business, the Heppner Cafe. The "door" is inside the cafe and will prevent loss of heat through the incoming and outgoing of customers. If Bob Runnion or Bob Grabill happen to meet in the entrance one or the other will have to back out to let the other through.

These are busy times—especially so for the one who has to plan and prepare the meals for the family, for she too is doing her share of war work.

It will be a boost to her's and the family's morale to eat out occasionally—to enjoy one of our STEAK DINNERS, or an oyster supper, or any one of the wide variety of excellent meals to be found on our bill of fare. Come any time . . . we're always prepared.

IN THE WAR!

BUT

WOODY'S READY FOR PEACE, TOO

From training camps to battle fronts, wood plays a vital role in the war. But soon again, wood will be building the fences, factories, homes and other essentials of a peace-time America.

FOR A WHILE, we must wait before we can build the homes we plan, or buy freely the thousands of other items that come from trees.

Wood's job in war only started with the construction of hundreds of training camps. It continues overseas wherever our troops are fighting.

But, because civilian uses have been curtailed almost to the vanishing point, our forests are able to meet this challenge, and will be able to supply us in the years to come. For wood is a crop which can be grown as a farmer grows crops of grain. Millions of acres of thriving seedlings are becoming our forest crops of tomorrow.
