These are busy times—especially so for the one who has to plan and prepare the meals for the family, for she too is doing her share of war work.

It will be a boost to her's and the family's morale to eat out occasionally—to enjoy one of our STEAK DINNERS, or an oyster supper, or any one of the wide variety of excellent meals to be found on our bill of fare. Come any time . . . we're always prepared.

## WOODY'S "90 POSTMASTER" TOO

Enough wood was used shipping military supplies in 1943 to build 700,000 six-room houses. That is where your new home is gone, but only for the duration.

WOOD will be ready to serve all of us again as soon as the war ends, because the forest industries have almost no problems of plant conversion. Millions of men will go to work building the structures we have been unable to build during the war.

During these war years, our forests have been preparing for the future by growing more than 11 billion cubic feet of new wood every 12 months. Our forest lands—a third of the nation—can continue to produce the wood America needs if they are protected from fire and other damages. Forests are our only major resource which constantly replenishes itself.
