**Holiday Hospitality Calls For Cookies**

**C**HRISTMAS time is a time for reunion of friends and family, and simple refreshments are part of the friendly gatherings. Bring on an attractive tray of home made cookies, pour hot tea or coffee for the grown-ups and cocoa for the children, and it's a party.

Cookies can be made ahead of time and stored in a jar or tight container until needed. Having baked goods on hand solves the desert problem on busy days, too. These tested cookie recipes use blended shortening, made of meat fats and vegetable oils, blended for a good all-purpose shortening at low cost.

Dough can be forced through a cookie press in any shape you like—wreaths, spirals, stars or bells. Little sugar candies make them more Christmasy. Refrigerator cookie dough can be rolled out thin and cut into fancy shapes if desired.

ON THE SEVEN SEAS

Wood can take it. Cras. boats, PT boats, combat and cargo vessels by the thousands are made of wood. These grueling tests of war help make wood even more useful for its tasks of peace.

**W**HETHER your post-war plans include a boat of your own, a cottage or a mansion, wood will serve you better and in hundreds of new ways after victory is won.

Like our fighting men, it will come back from war fronts fit and eager to resume its normal functions. Wood will be more important to you than ever before, because industry and science have been working together to discover new and better uses for this versatile raw material.

As young forests replace those that have been harvested, wood will continue to add to our comfort and well-being.
