## THE AMMUNITION"

AMERICAN forest products are in the thick of the fighting . . . . as ammunition boxes . . . . as wood cellulose explosives in the ammunition, itself . . . . as rifle stocks in the hands of doughboys . . . . and even as the wings and bodies of bombers which have raided Berlin!

That's why the Army and Navy have called to the forest products industries to "pass the ammunition" . . . . those kinds of it which the forests supply. In turn, that's why this company and thousands of other lumber mills, plywood factories, and wood-pulp plants, are working as fast as manpower permits.

Fortunately for the nation, the forests can "stand it." For more than twenty years, the forest industries have been helping to increase the annual amount of new wood created by growth. Today, more than one-third of all the land area of the nation is forest-land . . . . and the amount of new wood created by annual new growth is still steadily increasing!

That's why that we are able to rejoice that when the war is over there still will be an abundance of wood in the American forests.

## KINZUA PINE MILLS COMPANY

### Mayor Makes Appeal for Clothing for Illy Clad Thousands of Heroic Russians

In that portion of Russia that was over-run by the German horde in 1942 and 1943 and retaken by the Russians in 1943 and 1944, great suffering has been caused from hunger and exposure. Lend-lease is doing what it can to supply food and now a national drive is being instituted in this country to supply clothing to those war-torn sufferers.

We are not being asked to give the clothes off our backs, nor to buy new ones, nor to give money, but to give our cast-off clothing—clothing that we have thought too good to throw away, but which we probably will never wear again. Our closets are too full of that kind of material and now is a good time to dispose of it—and for a good cause. Let's help those who have helped us mightily.

Clothes that are positively worn out are not wanted, nor are clothes that are dirty, nor do we want clothes that you will wear again. But clothes that are soiled and somewhat worn, but have a lot of good wear in them yet, will be very acceptable.

Clothes should be tied in bundles or packed in cartons. Shoes should be tied in pairs.

Most of these clothes will be collected through the schools, but those families that have no direct school connection—no students in school, may leave their bundles at the Red Cross Sewing Center in Heppner—formerly the Hughes store—in the Oddfellows building on Main street. The American Legion and the American Legion auxiliary are cooperating in this drive and will maintain an attendant and the above designated building will be open on February 8, 9, and 10, from 10:00 o'clock a. m. to 5:00 p. m. each day. All persons who will bring clothes to this center are particularly requested to do so on those three days, for the building will not otherwise be open. The schools also are cooperating in this drive and all material taken to the schools will be collected during those three days and will be delivered to this center. The Legion and auxiliary will then sort, pack and ship the goods to the proper designation in Portland. Don't forget—February 8, 9 and 10. And please remember the valiant Russians!

J. O. TURNER, Mayor.
