

Irrigon News Notes

By MRS. J. A. SHOWN

Don Kenney and sons went to Pendleton to get pea hay Monday. Mrs. Otto Meyers and four children of The Dalles arrived in Irrigon Monday to visit Mrs. Emma Steward.

Miss Lela Thompson won one of the \$100 war bonds that was raffled off in the bond rally at Umatilla Friday night. She lives with her uncle Ora Thompson and family here.

Cpl Clarence Rucker of the Marines arrived Sunday to visit his parents, the Elmer Ruckers. He has been gone for about three years.

Mrs. Earl Connell and two sons spent from Thursday to Monday with her mother Mrs. Gene Lewis and family at Boardman.

Mr. and Mrs. Robert Smith and son Steven, Mrs. Sam Smith, Mr. and Mrs. Tom Caldwell and Mrs. Josephine West and four children spent last week in the mountains returning Sunday.

Mrs. Eleanor Brown, county librarian at Bend was a caller in Irrigon Tuesday.

Billy Allen S 2/c is to be stationed at Pasco in the entertainment center he informed his mother, Mrs. H. W. Grim.

Mr. and Mrs. Lloyd Aldrich and son Allen have moved to Tillamook to live on a dairy farm. They rented their home to Mr. Bentley from Boardman.

Carl Haddox and family went to Bingham Springs for the 4th of July.

The Henry Miller family harvested a good crop of potatoes on the Leicht place this week.

Mr. and Mrs. Earl Isom and Donna spent the 4th at Mecham lake.

Mrs. Albert Cline arrived home from Walla Walla Tuesday. She has been taking treatments there.

Robert Waters is home spending

"Diesel Stove." War Bonds furnished Seabees with equipment needed to construct this stove from salvage on which pretty Philippine girl cooks meal for hungry folks on Tinian. U. S. Treasury Department

a few weeks with his mother, Mrs. Jack Browning and other relatives.

Mr. and Mrs. Milton Bailey visited in Pasco over the 4th with Mrs. Bailey's parents, the Roy Van Cleves.

Mrs. Grace O'Brien arrived home from Riverside Calif. where she has been with her husband Glen O'Brien who has completed radar and bombing practice and has gone to a port of embarkation.

Waste Paper Need Greater Than Ever

Residents of Morrow county can supply enough waste paper for 14,456 "suits of armor" for 105 mm. shells, if they will buckle down and save an average of 10 pounds of newspapers, wrapping paper and boxes a month. The 105's are the big ones that have been helping American forces in their advance toward Berlin and Tokyo.

Last year Americans saved 106½ pounds of paper per capita, or enough for about 35 containers each for the 105mm. shells.

For each ammunition container or "paper suit of armor" used to protect the shells from salt water, dents nicks and corrosive dirt, approximately three pounds of waste paper are required. Ammunition container board, one of the principal materials used in making the "suits of armor," is made from

mixed paper and old corrugated boxes. Another material used is called "tube and can stock", which is made from all types of waste paper.

Salvage Drive to Be Made in July

A statewide drive to salvage waste paper and tin cans will be held during the last week in July, according to Mrs. Lucy Rodgers, county salvage chairman. The drive comes during one of the busiest periods in this section but critically-needed paper and tin must be gotten in and forwarded to reprocessing plants at once if the war effort is not to be handicapped.

Almost 90 percent of our tin imports before Pearl Harbor came from mines in Malaya, Sumatra and the Dutch East Indies—territory captured by the Japanese—leaving much of the sorely needed

materials here at home. The county supply to come from salvaged tin must collect 600,000 tons of waste paper each month during the summer if we are to meet demands of our armed forces for the shipping materials they will need.

A New "House of Magic" for Postwar America

"...one of the strongest guarantees of progress and world peace is continuous scientific preparedness through industrial research."

General Electric has approved plans for a new \$8,000,000 Research Laboratory. This expenditure has tremendous significance. Scientific research has contributed much to our progress as a nation.

"Many things have been discovered during this war, and we can and must develop them into better things for peacetime.

"Today we have 550 research people on our staff. These new facilities will not only give increased outlet for their abilities, but will provide opportunities for new research minds with new talents.

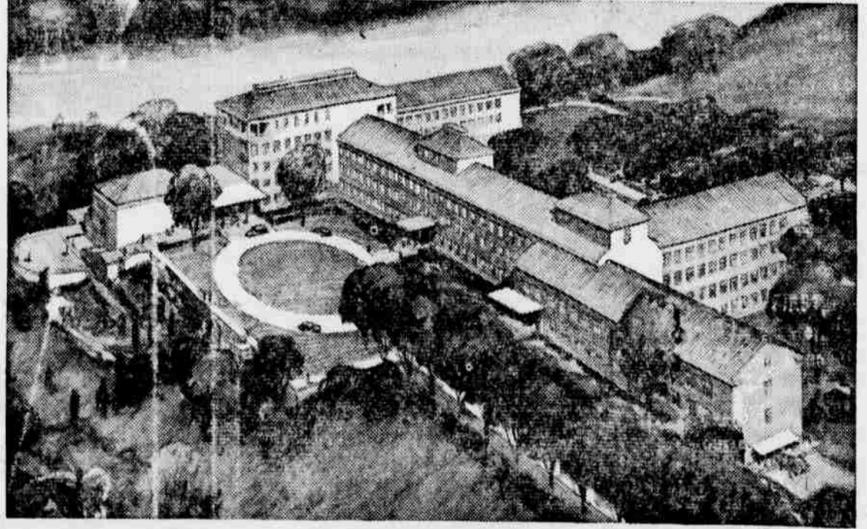

"From this new laboratory we think new achievements will come. In the past, G-E research has contributed much to better living in America—not only through new developments in x-ray,

electricity, metallurgy, electronics and chemistry, but also through reduced cost and increased efficiency, as in the modern incandescent lamp.

"Even more than in the past the laboratory will emphasize research in pure science—continuing and expanding the work begun by Dr. Whitney and the late Dr. Steinmetz forty-five years ago.

"To find new facts of the physical world, to extend the limits of knowledge, is a forward step in creating More Goods for More People at Less Cost."

W. E. Brown
President
GENERAL ELECTRIC COMPANY

New \$8-million-dollar G-E Research Laboratory will be built five miles east of Schenectady, New York, on the Mohawk River. The geographic location offers special advantages for television, high voltage x-ray, and radar research. Buildings with 300,000 square

feet of floor space will accommodate an expanded post-war research staff of about 800. Research rooms will be a scientist's paradise of equipment for experiments in chemistry, physics, mechanics, electronics. It is hoped that construction can start in six months.
