DO YOU HAVE AN ELECTRIC RANGE!

I'LL HEAT ALL THE WATER YOU WANT FOR ONLY ABOUT \$2.70 A MONTH MORE

YOUR ELECTRIC SERVANT

IT'S BEAUTIFUL

The modern electric water heater is streamlined and attractively finished just like your electric range and refrigerator. Put it in your kitchen if you like, for a thick blanket of insulation holds heat in the water.

AND IT SAVES CLEANING... no smoke or grime to dirty up walls and curtains.

AND IT SAVES WORRY... no turning on and off makeshift water heaters, or firing up under coils. Install and forget it.

AND IT SPEEDS HOUSEWORK... you always have oceans of clean hot water to help you. No waiting.

When you cook electrically you can go on and buy additional electricity at a still lower rate...because PP&L's "all purpose" rate drops down to only 6 mills per kilowatt-hour after you've used 250 kilowatt-hours. So why not go all-electric? Use this cheap electricity for heating water the safe, clean, automatic way.
