IT COSTS *More* TO BUILD AND OPERATE A POWER SYSTEM, TOO!

● Clothes aren't the only things that cost more these postwar days... everything that goes into construction and running a modern electrical system costs more, too. For instance, PP&L's average wage rates are up 44% since 1940...taxes are up 70%...the price of poles is up 100%!

➡ **...yet PP&L has cut average electric prices 30% in the last 6 years!** It may be hard to believe, but check the records. PP&L's average rate for residential electric service is only about two-thirds what it was in 1940!

Expenses are higher, yet electric prices are lower. How is this possible? The answer is 36 years of electrical "know how"... efficient management...good hard work.

...now more than ever
"It takes experienced business management to keep cutting your electric rates."
