We are diligently concentrating..... on providing service to waiting applicants as fast as it is humanly possible to do so

Every effort is being made to improve the quality and efficiency of our service

Directing our efforts as we have to render service as rapidly as possible to all who want it and to make our service even better than it has ever been before, the 2,886,000 telephones in service as of May 31, 1946, include an increase of 254,000 since V-J Day, of which 183,000 were added in the first five months of this year—an unequalled increase in any similar time period in the history of our company.

The telephone increase since V-J Day exceeds by 67,000, or 36 per cent, the 187,000 increase in the year 1943—the largest yearly telephone increase ever recorded by our company. The telephone increase for the first five months of 1946 exceeds by 69,000, or 60 per cent, the 114,000 increase for the entire year 1945.

New applications for service—totaling 340,000 for the first five months of this year—increased 107 per cent over the corresponding period of a year ago. Of the 286,000 prospective subscribers at the first of the year whose applications had been necessarily deferred due to shortage of facilities, we are glad to report that 183,000, or 64 per cent, have been cared for. Due, however, to the time necessarily involved in the installation of complicated switchboards—in many instances new buildings are required to house them—together with the large number of new applications and the continued materials shortages and disturbed conditions throughout the country affecting manufacturers' production, 229,000 applicants are still waiting for service.

We are diligently concentrating, notwithstanding the difficulties in obtaining adequate apparatus and materials, on providing service to waiting applicants as fast as it is humanly possible to do so. Likewise every effort is being made to improve the quality and efficiency of our service.

Construction of additional toll and long distance circuits has gone forward with rapidity and continued improvement is being made in the service even though the volume continues at record high levels—the calls being 20 per cent greater than in the corresponding five-month period of a year ago.

Our company has recently made substantial further postwar increased wage adjustments, aggregating \$6,000,000 on an annual basis, as a result of collective bargaining negotiations with the unions. These added wage increases are over and above the postwar adjustment wage increases made in December of last year which aggregated more than \$18,000,000 on an annual basis. Thus, this recent wage increase, embodied in a contract to run until March 1, 1947, brings the postwar adjustment wage increases, arising out of collective bargaining, to more than \$24,000,000 annually—the increase in our postwar wage rates being 19 per cent. The recent collective bargaining negotiations between our management and the unions extended over a period from April 24 to May 18, 1946, and at no time throughout the negotiations did the unions or the company fail to realize that the public interest came first. Net Income has been adversely affected by increased costs of operation, particularly the large added wage expenditures.
