**Howdy Folks:** The human brain is a wonderful mechanism. It starts to function when we get up and never ceases until we start to writt this column.  
 Sometimes we feel just like the newspaper man sitting at his typewriter trying to get an idea, and with nothing to get off his chest but a must'rd plaster.  
 Of course, we could clip our paragraphs from others but that would be sheer folly.  
 It takes some folks five years to finish a book, and then again it takes others a life time to finish a sentence.  
 It only requires a sentence to tell about the wonderful quality of our Motor Tune-up.  
 Any of our customers will tell you that there's no other service that will give more satisfaction for the money.
