Heppner Hardware and Electric Company

Hats Off to this Fellow...

HE fed us, our soldiers, our allies, and a lot of other people while we won a war. Now he's asked to keep the world from starving.

He's the American farmer.

He deserves the thanks and appreciation of everybody. He deserves it more than most folks realize because he increased his production by 30 per cent in five years without enough new tools to replace the labor he lost.

But, American farmers are disappointed—and they have a right to be. They expected that the end of the war would bring them an opportunity to replace their patched, repaired, weary and over-worked farm implements.

Of all of our shortages, that in farm tools and implements is the most serious.

Strikes have caused the shortages in farm implements—strikes in steel, strikes in coal, and strikes in the farm implement industry itself.

In the steel industry alone, the production of steel in the ten months following VJ day was 19 million tons short of expectations, enough to supply farm needs for at least five years. Most of the decline was due to strikes.

That is why the steel industry has not been able to catch up with the demand for new roofing, wire, fencing, tools and all the things of steel needed on the farm.

That is why the farmer is being penalized through no fault of his own. This nation cannot move ahead under the threat of ever-recurring labor strife.

Steel mills need all the scrap iron and steel they can get. Farmers can help increase steel output by sending worn-out machinery, etc., on its way to the furnaces. AMERICAN IRON AND STEEL INSTITUTE, 350 Fifth Avenue, New York 1, N. Y.

The Institute has printed a booklet STEEL SERVES THE FARMER. Write for a copy and it will be sent gladly.
