Howdy Folks: We recently read quite an article about the wonders of face lifting by a certain plastic surgeon.

Face lifting may be all right for women, but if a man is at all patient his will grow right up through his hair.

These plastic surgeons can do almost anything with a nose except keep it out of other people's business.

Of course the earliest known method of face lifting was with a rope.

We have a notion that the face that is lifted by these plastic surgeons falls again when it sees the bill.

Someone remarked that a snob is one who was born with his face lifted.

Some men have such long faces that their barbers should charge them double for a shave.

Speaking of double prices, we have been able to keep our prices level on our service. Check with us on it.

From where I sit... by Joe Marsh

On Playing the Fiddle Badly

A favorite recreation in our town is getting together in one or another's home and making music. There's somebody at the piano; a guitar; a fiddle player; and Molly Birtles even has a harp!

What comes out isn't the best music in the whole world. In fact, a lot of it is downright bad. But nobody even thinks to question or to criticize.

Because the spirit of harmony is there—harmony between folks who like each other's company, who enjoy the simple, homey atmosphere

—with nothing more exciting than old songs, and a glass of moderate beer or cider.

From where I sit, it's a heap more important to be a poor fiddle player, than not to play at all. More important to be a part of the American scene—with its community music, home entertainment, friendly glass of beer—than to hold out for professional perfection. (Besides, I like to play the fiddle—even badly!)
