Home Craftsman Books High On Gov't Best Seller List

The greatest mass-production country in the world today, the United States, is still a nation of home craftsmen. This is proved, according to officials of the Government Printing Office in Washington, D. C., by the constant popularity of the "You Can Make It" series.

Prepared a few years ago by the National Committee on Wood Utilization, this set of three booklets has been a best seller in all seasons of the year. The publications contain illustrated instructions on how to make useful articles for the home, the garden, and the camp as well as playthings for the children, using only a few simple tools, discarded wooden boxes, and odd pieces of lumber. Each book in the set tells how to finish the wooden articles to make them attractive as well as useful. Practically all the items are accompanied by detailed drawings. There are also drawings of the various tools and small pieces of hardware used in the construction.

"These books are so easy to understand, that's what makes them so popular," a Printing Office official said.

Information on making things for outside the home such as a trellis, arches, lawn seats, dog house, bird houses, etc. and for inside the home such as racks, chests, bookcases, cabinets, camp furniture, etc., is to be found within the pages of the "You Can Make It" series. There is also useful information on wood selection, plywood, glues, glue joints, and other woodworking details. Orders should be addressed to the Superintendent of Documents, Government Printing Office, Washington, D. C. The 30 cents should be enclosed with the order (no stamps, please.) All proceeds go to the Government.

sergeant-at-arms. The Legion voted to start a Boy Scout organization and look for a scoutmaster. They also appointed a recreation committee to meet with the grange recreation committee.

1. Bill does not prohibit commercial fishing in coastal streams. It regulates WHEN, WHERE and HOW fish may be taken.
2. Bill actually affects your round employment of very few—perhaps not 25.
3. Bill would save about 90% of our steelhead. (Note: A steelhead is a rainbow that has gone to sea and returns.)
4. Bill does not affect commercial fishing on Columbia nor does it affect the taking of SHAD.
5. Bill No. 312 would assure a future supply of Oregon's No. 1 foodfish, the salmon—and protect Oregon's No. 1 tourist attraction—the steelhead.
6. Bill directs Fish and Game Commission to conduct studies in order that we may have FACTS with which to manage and safeguard Oregon fisheries.
7. Taxpayers are now paying \$165,000.00 each biennium to maintain fishing for commercial interests. More protection will help rebuild the fishing, thereby reducing taxpayers' load.
8. Legislature has tried on two occasions—1941 and 1945—to save these fish for YOU and the FUTURE. Now your help is needed to make this bill (312) a law.
9. NO TAXES. This is not a money measure. Rather it would help reduce taxes.

At an American Legion meeting Tuesday evening, October 22, the following officers were elected: Jack Baily, adjutant; Ted Palmateer, finance officer, and Ernest

Grandma will tell you that Pearl Oil was a kerosene leader in her day—just as it is now. It doesn't give off smoke, soot or gases that might smell up rooms. It gives more heat with bright steady flame that won't creep up to scorch pies, cakes. And Pearl Oil is pure—it all burns—no waste! Use it in all your kerosene appliances.
