### FIXING UP the HOME By Diane Greter

#### LIGHTING THE KITCHEN

THE kitchen is the workroom of the home. The average housewife spends from five to seven hours a day in the kitchen. Yet kitchen lighting has been altered little in the past decade. Tests made in factories during the war proved that light is the greatest single factor in combating fatigue.

It is true that most kitchen planners nowadays locate the sink beneath a window, yet in actual practice not all kitchens lend themselves to this arrangement. In too

Hall of The Dalles, Rev. and Mrs. Renel Snider of Hood River, and Mrs. Whiteside and Mrs. D. G. Rempel of The Dalles.

many cases the housewife stands in her own light when she prepares foods and is consequently tired and nervous without realizing the cause of the trouble.

An inexpensive light fixture above the sink will pay dividends in convenience and increased efficiency far beyond the cost and trouble of installation. This is true even when the sink has a window above it, for at least a portion of all kitchen tasks must be performed after sun-down.

Fluorescent tubes recessed in the wall above the sink give excellent light and a look of streamlined modernism, but ordinary incandescent bulbs, properly shaded, are equally satisfactory. Well-insulated, shock-proof fixtures are a wise choice.

### Gas & Air

Howdy Folks: Auto accidents are on the increase. Almost daily we read of tragic cases on the highway.

Such accounts of suffering dampen our ardor as far as writing humor is concerned.

Many drivers are in such a hurry to get into the next county they keep right on going into the next world.

Too many drivers try to horn in.

Reckless drivers are seldom wreck-less long.

Just remember, folks, it's better to be a pebble on the beach than a large tombstone.

We'd like to have you remember us next time you need brake service. Drive down (safely) and see us, won't you?

### Report to people who are waiting for telephone service

But the Pacific Coast's growth makes job bigger than ever

Despite severe shortages of materials, we have added telephones at a record pace this year. So far, more than 305,000 have gone into service.

Still, there is a tremendous job to do before we can catch up with the Pacific Coast's spectacular growth and provide service for everyone who wants it. Millions of dollars worth of additional equipment must be manufactured and installed to take care of the orders on hand and new applications which continue to pour in every day.

You may be certain that we are doing everything we can to hurry the day we bring your telephone to you.

Thank you for your patience and understanding.

Barbara Heliker, executive committee, Vida Heliker, Oscar Lundell and Marion Palmer.

### From where I sit... by Joe Marsh

Folks weren't surprised when Bert Childers won first prize for his corn at the county fair.

Yet the judges admit it wasn't just because Bert had the finest ears of corn. He knew how to display them: neatly arranged, with the husks cleanly trimmed, and the booth white and spotless.

"Trimnings" sure make a difference no matter what you're offering—as Andy Botkin, keeper of the Garden Tavern, well knows. Andy doesn't just sell good beer. He sells it in a place that's clean and attractive... in nice surroundings that

belong with the enjoyment of a wholesome beverage of moderation.

And Andy, of course, is a whole-hearted supporter of "Self Regulation." That's the system by which the brewers and tavern keepers themselves make sure that taverns selling beer are clean and orderly.

From where I sit, people like Andy also rate a "First prize." Not just for the quality of the product—but for the "trimmings" too.
