Howdy Folks: After emerging safely from the "Gay Ninety" era, we wonder if it wouldn't be proper to classify the present period as the "frightened forties"?

They say that everything goes in circles, and we seem to be creating bigger and better circles to go round in.

This is an age when we develop more machines to provide more people with more leisure in which to be more bored.

It's an old saying, but true, that when the time comes that we spend more for face powder than we do for gun powder, then we can honestly say that we are making progress.

Right now, we can figure that we are making progress if we break even.

In a lighter vein, we know a woman who claims she's making progress learning to drive a car, because, as she says, the roads turn when she does.

Well, "there'll always be a United States," and we hope we'll be on the job a long, long time to supply you with automobile service.
