Howdy Folks: We are back again.

The telephone is one of the world's greatest inventions. It connects you with so many strangers.

A man should be very careful about marrying a telephone operator, though. She seldom rings true.

Her job is neither a trade or a profession. It's a calling.

She comes close to being a saint. There's a continual hello around her head.

Of course a party line keeps the neighbors well informed.

The telephone has made a sucker out of a nickel. It causes the poor old jitney to get so many wrong numbers.

Jitneys saved become dollars, you know. That's why it's good business to buy our body, fender, and luxurious painting service. We'd like to tell you more about this.
