RESOLUTIONS OF SYMPATHY

It is with profound sorrow that San Souci Rebekah lodge No. 33 of the Independent Order of Oddfellows adopts the following resolutions:

Whereas, the Almighty Father has seen fit to call our beloved brother, L. A. Florence, to his eternal rest, and whereas, his presence and help will be sorely missed,

Therefore, be it resolved, that San Souci Rebekah lodge No. 33, in testimony of its loss and in

expression of its love, drapes the charter. Be it further resolved, that the deepest sympathy of the lodge be extended to the family of our departed brother, and be it further resolved, that a copy of these resolutions be spread on the minutes of the lodge and that a copy be sent to the bereaved family.

CATERPILLAR DIESELS
are designed FOR LONG LIFE

*** Take the oil filters for instance. "Caterpillar" lubricating oil filters were developed specifically for "Caterpillar" Diesel Engines and play an important part in prolonging life. They are a combination metal edge and absorbent type.

The outer metal elements are cleaned and replaced when the oil is changed while the low-cost inner elements are discarded and new ones installed.

Come in and see us. We'll be glad to show you first hand how efficiently the "Caterpillar" oil filters keep oil clean.

FOR YOUR SAFETY

Every known facility for safe operation and control of an automobile is built into it. These safety features have been given gruelling tests, they have been proved and perfected by years of the finest engineering experience. But their maintenance and handling are up to you. Safe driving depends upon the efficient operation of these factors.

Watch your steering gear for excessive play—keep your brakes in trim, inspect tires for weaknesses that may result in blowouts. Be sure all lights are working, "one-eyed" cars are dangerous. Check your mirror for clear rear-vision. Be sure your horn works—but don't abuse its use. Do your windshield wipers wipe?

Remember, no matter how good the safety features of your car—they are only as good as your ability to control them. If you are overtired from driving strain—stop, rest, drink a cup of coffee. If you are mentally or nervously upset, let someone else drive. If you've been drinking, stay off the road.

Keep your car—and yourself—always in condition for safe motoring.
