Square Biscuits, Yet!

I see by a neighboring paper, that the round biscuit is on the way out. Yes, sir, home-management specialists have found that the square biscuit lends itself to assembly-line production and easy storage better than those customary ovals.

Well, we're all for progress, but that's one new idea we just don't cotton to. A round biscuit, spread nicely amidships with snappy country cheese, looks like a biscuit! And accompanied by a mellow glass of beer, it's a combination that you can't improve on!

So at the risk of being called old-fashioned, I'm voting for round biscuits, that fit a hungry man's mouth like no square imitation ever will... and for American beer served in the good old-fashioned way, in tall, cool mugs or ordinary glasses, with frosty sides and bubbles winking at the brim!

Think I'll step out to the kitchen for a snack right now!
