U. P. Agriculture Car Tours West

An agricultural improvement car which serves as a meeting place for farmers, vocational agriculture students, county agents and agricultural speakers is currently touring the west under the sponsorship of Union Pacific Railroad. States to be visited include Utah, Idaho, Washington, Oregon, Wyoming, Colorado, Kansas and Nebraska. In the above picture, A. J. Seitz, standing, Union Pacific vice president in charge of traffic, and Joe W. Jarvis, supervisor of the railroad's agricultural development department, talk things over with a typical audience. Assisting Union Pacific on the project will be state agricultural colleges, which will provide speakers on such subjects as dairying, insect and pest control, plant production, fruit marketing, poultry, livestock, and row crops. The air conditioned car is completely equipped for the showing of motion pictures.

Weeds - Weeds - Weeds

You can't scare them to death with the magic letters - - -

"2,4-D" on the label. There must be 2, 4-D in the spray.

The extension division at Oregon State College and your County Agent recommend one pint or 7 oz. of parent 2, 4-D acid to the acre in an ester spray and it is unwise to use less, until you have proven by experimentation in your own field under local conditions that less will do the job.

We offer Zehrun's Isopropyl Ester Liquid 2, 4-D, 3.34 lb. per gallon at \$9.65 per gallon. Each gallon will cover eight acres at the recommendations of the State College and your County Agent for annual weeds at a cost of \$1.21 per acre for material.

From tests made during last summer we believe that better results can be obtained in hard to kill weeds such as morning glory, Canadian thistle, etc. by using one full pound of parent acid per acre in Alkanolamine. We are offering Zehrun's Alkanolamine Liquid 2,4-D with 4 lbs. of parent acid per gallon at \$8.55 per gallon. Also Zehrun's Isopropyl Ester dust at 15c per lb. for those having dusting equipment.

Before you purchase your spraying equipment we strongly urge you to see our Mistmaker Sr. spray unit. . . Light, powerful, efficient. A simple single nut adjustment will give you either high or low pressure application.

If you want to get away from having to irrigate your field while you are killing the weeds let us show you how to do it with as little as three gallons of water per acre and still evenly spread the recommended amount of 2,4-D uniformly over the field.

No stirring or agitation is necessary on Zehrun's spray materials. All are 100 pct. water soluble.

Let us remind you: We supply Liquid Rotenone for cattle grub spraying and liquid DDT for ticks and lice. Current price on materials about 3 cents per head.

Come in and let us discuss your spray problems.

Place your orders for materials now while supplies are available at the above prices.

From where I sit... by Joe Marsh

Who Are We, Anyway?

Subject came up at Bill Webster's, the other day, as we were chatting over beer and pretzels. Just who are the folks who make up our town? Where'd they come from?
Well, Doc Hollister's Scotch-English ancestry; Will Dudley's folks were mining stock from Pennsylvania; Skip Powell's family were brewers back in Holland.
Guess our bloodstream's got a bit of every country of the globe—and every section of America. We've still got differences in taste and background—whether they apply to music, history, or beer. Only those differences don't matter—because we're self-respecting people, in a free, united land.
And from where I sit, that's what makes our towns and cities—our America—so strong, progressive, tolerant. Our championship of individual liberties has brought us people from all faiths, all lands—to prove that respect for one another's rights is the greatest bond humanity can know!

All licenses bearing the serial numbers 5R231001 become void on January 31. Any licenses numbered below 5R231001 is past due for renewal.
Under Oregon's new license renewal system, now in its eighth month of operation, driver's permits expire in blocks of 33,000 each month in accordance with the serial number on the face of each card. Printed schedules issued by the secretary of state list the correct renewal dates. These may be obtained from sheriff's offices, police stations, or from driver's license clerks and examiners.
The procedure was adopted to offset the yearly rush of renewals under the old system and resulting strain on driver's license division personnel.
"Every driver must obtain a renewal schedule and check it carefully," Newberry emphasized. "Then it's simply a matter of applying for renewal at the proper time."
No advantage is gained by delaying until after the proper time, a license spokesman explained. The license issued will expire at the same time as if taken out during the correct month.

On a heavy-duty job, give me new Advance-Design CHEVROLET TRUCKS and here's a "load" of reasons why...

Only Advance-Design Trucks Have All These New and Finer Features:

- * Cab that "breathes"
- * Flexi-Mounted cab
- * Unwield, all-steel construction
- * Larger, more durable, fully adjustable seat
- * 22% greater visibility
- * New, rear-corner windows
- * Stronger, new frames
- * Full-floating hypoid rear axles
- * Specially designed hydraulic truck brakes
- * Valve-in-Head Thrift-Master or Load-Master engines
- * More efficient loading (stake and high-rack bodies)
- * New, through sealing insulation
- * Standard cab-to-axle-length dimensions permitting interchange of bodies
- * ... and MANY more!

There's nothing like the cab that "breathes" for comfort! ... fresh air is drawn in from the outside—heated in cold weather—and used air is forced out. The cab is cushioned on rubber-filled mounts—with 12 inches more foot room and eight inches more seating space. There's 25% greater visibility, too, they tell me. The seat is fully adjustable. Man, this is it!

Lock—rear-corner windows! Now it's a cinch to back up without awkward jockeying. Yes, air these trucks are brand new—truly different with Advance-Design. And they're packed with power!

Here's a special, heavy-duty job and an extra-special truck! Take your pick from 107 different models and eight wheel-bases. There's one made for your special kind of job.
